VIA ELECTRONIC FILING

The Honorable Julius Genachowski, Chairman
Federal Communications Commission
445 12th Street, S.W.
Washington, DC 20554

Re: Comments to Further Notice of Proposed Rulemaking
Amendment of Parts 15, 74, and 90 of the Commission's Rules Regarding Low Power
Auxiliary Stations, Including Wireless Microphones
WT Docket Nos. 08-166, 08-167; ET Docket No. 10-24

Dear Chairman Genachowski:

As a provider of event technologies, on behalf of Scharff Weisberg, I am requesting that you grant us individual wireless licensing. For over thirty years we have provided wireless microphones, wireless in ear monitors and wireless communications for events all over the country. These events include corporate conferences, stage events in arts and entertainment, United Nations gatherings and speaking engagements with the President of the United States.

It is critical to our events that the wireless microphone signal is continuous and free of interference. Additionally, it is imperative that the client can communicate freely via wireless communication to our production staff. When communication is interrupted it impedes the advancement of the initiatives being presented.

When an individual takes the stage their message is communicated mainly by spoken word. If there is interference in the wireless signal, people in physical attendance will miss the presenter's message and it also affects individuals who are listening over a live broadcast, with a phone bridge, or through a webcast.

We rely extensively on wireless technologies and have earned a stellar reputation in our industry as a preeminent provider of event technologies.

Should the FCC allow individual licensing, Scharff Weisberg would be interested in obtaining said license.

Please feel free to contact me directly for further information in support of our request for an individual license. We appreciate your consideration.

Very truly yours,

David Lynd
