Professional Sound Production For Your Event

February 22, 2010

Dear Sirs,

We are a sound reinforcement, live recording, and system installation company located in San Carlos, Ca. We use and sell wireless microphones as a vital part of our business in churches, sporting events, theater and concerts, all of which enrich the culture and lives of our community. Can you imagine paying top dollar for a theater ticket and having some interference interrupt the performance? What about a heavily-populated concert and the wireless system starts broadcasting taxi calls to the crowd...a recipe for civil unrest and possible violence.

We are asking the FCC to protect wireless microphones from interference and ensure that wireless microphone users will be eligible for licenses. We want to ensure that any rule changes that the FCC adopts will allow us, the users, to obtain an FCC wireless microphone license and continue doing what we are doing now, for the price we are doing it now.

We also would like to point out that we should be represented equally in this matter. All businesses, large and small should be entitled to a fair decision.

Sincerely,

Gary Wood
