

NO to “net neutrality.” I am writing to demand the FCC keep their hands OFF my internet. I am in favor of letting the free market determine the winners and losers for internet service providers. Free competition will punish bad behavior, and reward those firms who are prudent and ethical. It’s no accident that today, wired broadband Internet access is cheaper and easier to get than the *regulated* wired phone, wireless phone, and cable television markets. So please keep your hands OFF MY INTERNET!

Respectfully submitted,

Sally Absher
