RE: Developing a Unified Intercarrier Compensation Regime, CC Docket No. 01-92; High-Cost Universal Service Support, WC Docket No. 05-337; A National Broadband Plan for Our Future, GN Docket No. 09-51

Dear Ms. Dortch:

Pursuant to a staff request, AT&T is submitting additional information to supplement the record in the above proceedings. Attached is a list of interstate and intrastate local switching and tandem switching rate by state for the AT&T ILECs. As states do not always have the same intrastate access rate structure as interstate, additional rate elements may be needed for developing composite state rates. In this matrix, we have identified some significant ones (e.g. the call set-up charge in California), but to keep this matrix manageable we have not included all of them. It should be noted that Local and Tandem Switching rates shown in this matrix are strictly those two rate elements (and a few additional non-standard intrastate rate elements). This matrix does not include additional components like End Office Trunk Port charges, Tandem Trunk Port charges and Tandem Switched Transport charges that would normally be included in the development of average access rates depending on the particular rate structure used in any given jurisdiction.

Please call me if you have any questions.

Sincerely,

/s/ Brian J. Benison

cc: Rebekah Goodheart
