

You people made this company wait 17 months to ok the merger. Now, you are taking away that right to operate in a non-restrictive band without having to worry about signal disruption, to having to contend with it caused by you people. For once, do the right thing, stop putting up road blocks and let this company survive.

Not only me, but others will be watching how you conduct yourselves. Make us proud of you for your actions not ones with your hands out. You know what I mean. Play fair.
