

I absolutely cannot believe you are about to let wireless carriers destroy Sirius XM after what you've already put this company through. Sirius and XM paid 170 million for their blocks of air space and the C and D blocks were only 14 million dollars because they are known to cause interference and are nearly worthless. This is criminal. Now you're going to start a movement amongst the people against the FCC. Good luck getting reelected if you let this happen. Sirius has more shareholders across the country than almost any other company – ACROSS THE COUNTRY. And no matter how much your girlfriend the NAB and your mistress the wireless carriers say they'll run ads to get you reelected, no one listens to that garbage anymore. What you're doing is wrong. Do you understand that? It's wrong.
