

Before the FCC decided to pursue Net Neutrality protections, Fox News Channel's Glenn Beck warned his audience that the government was "trying to take over the media." Beck later said that Net Neutrality would "wildly affect your life and free speech" by forcing a "Marxist utopia" on the Internet. Do not believe the overexaggerated claims made by Glenn Beck. His constant slander and mudraking cannot be trusted. Net Neutrality offers freedom of information and freedom of speech for all of those with online connections. These are the rights bestowed on us by our constitution. Killing Net Neutrality will narrow the flow of information and have it filtered by media moguls that want people to read and follow "their" information. Keep Net Neutrality alive!
