

Comments on WC Docket No. 10-75

It is my opinion that the FCC should not release raw Form 477 data to Free Press.

In their Request, Free Press states “Most importantly, Free Press proposes to release only aggregated data and analysis. It will not release individual provider names and would identify carriers by type.” This indicates that Free Press will have data not available to the Public if their Request is granted.

I believe that only the FCC should have access to the raw data. The FCC should be the body that analyzes the data. If the analysis does not meet the needs of the Public, then the FCC should enhance the analysis, not some private entity.

Respectfully submitted,
