Re: GN Docket No. 09-191

April 2, 2010

Dear Chairman Genachowski and Commissioners:

The Hispanic Interests Coalition of Alabama recently wrote to the commission to express our views on the proposed net neutrality rules. Then, as now, we feel like one of the most important issues for our community is the availability of broadband access to all.

That is why we are especially pleased to learn of the release of the national broadband plan to encourage and expand the availability and adoption of broadband. Many times technology can be a great equalizer helping everyone, especially those who struggle, to succeed. This has never been more true than today, but in order for broadband to be an effective agent of change it must be available to all. Your plan puts us on a path to accomplish this critical goal.

There is no more important task than doing everything we can to make this historic goal a reality. Conversely we need to make sure that we don't do anything that is counter productive to this effort. We cannot afford to delay or discourage investment in the infrastructure we so desperately need.

That is why we remain concerned about the proposed net neutrality regulations that have been proposed. We urge the commission to put its considerable resources where we need it most: in promoting the national broadband plan. That is where the public interests are best served, as well as the interests of all the diverse communities across our nation.

Thank you for your attention to our concerns and for your leadership in advancing the national broadband plan.

Best Regards,

A handwritten signature in blue ink that reads "Rubio".

Isabel Rubio  
Executive Director
