Subj: Comment on Proposed FCC Regulation

Re: Internet Neutrality

Comment on Proposed FCC Regulation To Protect Internet Neutrality

As a former broadcaster, I strongly support your proposed regulation that would protect internet neutrality.

I favor an open internet. Please don't allow this miraculous media to be corrupted.

Please change the misguided Bush era deregulatory moves and protect freedom on the internet.

Financial interests must never govern the available flow of internet information – especially since service providers are frequently monopolies in their service areas.

The FCC must now act to keep the Internet open and free of corporate gatekeepers.

Thank you for your kind attention to this comment.
