

The proposed "net neutrality" enforcement ruling now being considered by the FCC is only one of the many regulations being put forth by followers of Marxist and Socialists within our country, who propose methods to quell our rights to free speech. This enactment of "net neutrality" should never see the light of day!

All citizens are free now to express their thoughts, either with or against the actions of our current government, or our way of life. If this ruling is allowed, our Constitutional right to free speech will have been denied and only the ruling class will be heard. Please, don't allow this travesty to befall our freedom of thought and expression. Keep the internet pure, without any intervention of control or force, where ALL speech can be heard.
