

This bill will create a hardship for the Americans who can least afford it.

I recently stopped my Satellite service, when I went on medication.

The \$40 a month nearly pays for my meds, because the Dr. put me on the Walmart generic program.

Yes I have a computer, but the only affordable available internet access in my area is dial up.

The DSL lines stop 4 miles from my house, and I can't afford the satellite link.

The older one gets, the more TV is watched. By taking away free TV, you'll be hurting the very people that made this country what it is.

Thank you

Monty Duncan
