Re: MB Docket No. 10-56

Dear Chairman Genachowski:

As the president of Skye Cable XIII, Inc., a community access provider in Connecticut, I am writing to offer my thoughts on the Comcast and NBC Universal joint partnership currently under your review.

I believe that Comcast's work in the community, in combination with NBC's solid track record of local programming, will only enhance the ability of these two entities to serve localities in creative and exciting ways. I look forward to seeing what they can accomplish together.

At Skye Cable XIII, we provide residents of Waterbury, Middlebury, Prospect, Wolcott, Plymouth, and Terryville, Connecticut with access to non-commercial television programs, governmental and educational programming, as well as production and supporting services. We have an excellent working relationship with Comcast, and the company has provided us with generous support to help us meet our mission for many years.

In addition, Comcast's public, educational and governmental services, like Comcast Newsmakers and Comcast Spotlight, provide viewers with the local information they need to be informed and complement well the work we do at Skye. Our organization sees Comcast as a partner in achieving our goal of advancing public knowledge.

Comcast has consistently demonstrated itself to be a national company with a local presence – and a responsible and committed one at that. I look forward to what a collaboration of Comcast and NBC Universal will lead to and encourage the FCC to approve this joint partnership.

Sincerely,

Stephen W. Mindera, Jr., President
