Working Party 4A

LIAISON STATEMENT TO WORKING PARTY 1B

WRC-12 AGENDA ITEM 1.2

Working Party 4A wishes to express its thanks to Working Party 1B for the liaison statement in Document 4A/302 concerning the draft CPM text for WRC-12 Agenda item 1.2.

Working Party 4A noted that the draft CPM text currently addresses the enhancement of the international regulatory framework relating to the convergence between terrestrial (fixed and land mobile) services.

Due to the complexity of the matter, Working Party 4A was not in a position to examine the details of the draft CPM text as attached to the above-mentioned liaison statement. However, Working Party 4A wishes to indicate that with regard to any method being developed by Working Party 1B in response to WRC-12 Agenda item 1.2, there is a need that, in terms of compatibility and the status of allocations currently in force between terrestrial services, on one hand, and fixed-satellite and broadcasting-satellite services, on the other hand, the interference environment remains unchanged.

Status: For action
