

Please do not allow the Comcast-NBC merger!!!!

This merger will have a direct negative impact on competition, innovation and consumer choice and would likely usher in a new wave of media giants as other companies scramble to match Comcast-NBC's market power.

Comcast's proposed takeover of NBC-Universal and its broadcast stations is particularly troubling. The largest cable and Internet access provider could also control one of the nation's largest movie and TV studios. That's too much power for one company, and it's a threat to competition and innovation at a moment when new forms of online video delivery are emerging.

Our government is here to protect us from abuse by more powerful entities than ourselves.

Thank you.
