

**FCC Rural Health Care Pilot Program
WC Docket No. 02-60**

**Quarterly Report
January – March 2010**

Submitted by the

Michigan Public Health Institute (MPHI)
Jeffrey Taylor, Project Coordinator (PC)
Jeff Shaw, Assistant Project Coordinator (APC)

On April 23, 2010

Project Overview, History, and Current Status

The project is being managed by MPHI. The project consists of RFPs 00, 01, and 02.

RFPs 01 and 02. Due to delays the main RFP 02 encountered (see below), MPHI decided to move forward with two small RFPs for the Thumb Rural Health Network (TRHN). The TRHN is a consortium of eight (8) RHCPP-eligible hospitals located in the thumb region of Michigan's Lower Peninsula. These two RFPs will expand an existing tower-based wireless network by adding four more towers (RFP 00) and purchasing telecomm equipment for all nine towers within the network (RFP 01).

- ***History and Current Status of RFP 00 – TRHN Tower Construction.*** This RFP will build the four telecommunications towers. RFP 00 was posted in early May 2009. Six qualified bids were submitted. A vendor (Thumb Radio Inc. of Bad Axe, MI)—the lowest bidder—was chosen in late June, and a contract was signed on September 2. (The RFP requested quotes for five towers, but TRHN was unable to acquire the land for one of the five, so it decided to lease space on a nearby tower, reducing the number of towers to be built to four.) RFP 00's FCL was issued on September 24, 2009, and the Support Acknowledgement Letter was issued on October 2. As of March 31, 2010, two towers were complete except for site finishing; a third tower was about to be erected; and the fourth tower was on site and about to be assembled and erected. We expect all work on the four towers, including site finishing, to be completed by June 30.
- ***History and Current Status of RFP 01 – TRHN Network Equipment.*** This RFP purchased telecommunications equipment (radios, switches, routers, the network server, etc.) for the nine towers that are part of the TRHN network. RFP 01 was posted at the beginning of June 2009. Four bids were received although two contained significant deficiencies. A vendor (CDW-Government, Inc.)—the lowest bidder among the four—was chosen in late July, and a contract was signed on September 15, 2009. All of the equipment was delivered in December 2009, and the vendor submitted a set of three invoices that covered the entire contract. USAC paid these invoices in January 2010, so the RFP 01 project is complete.

RFP 02 – Statewide Telecomm Network. This RFP will build the statewide healthcare network linking as many as 500 health care facilities throughout Michigan (with the exception of nine southeastern counties that include the metropolitan areas of Detroit, Flint, Lansing, Jackson, Ann Arbor, and Monroe). This network will use fiber optic cable, T-1 lines, and other traditional “wired” technology.

- ***History and Current Status of RFP 02.*** MPHI submitted its RFP 02 to USAC for an informal review in late October 2008. The RFP received immediate approval, but the review of our 500+ sites took five months. The ARRA was announced in February 2009, and it soon became clear that funding would be made available to construct broadband infrastructure. Once plans for Michigan's stimulus-funded, intermediate-mile broadband infrastructure—which RFP 02

intends to build upon—were clear, MPHI submitted the RFP 02 465 package. MPHI posted the RFP on November 10, 2009. Seven vendors submitted proposals on February 15, 2010. For the total, five-year cost of the project, the high bid was 431% larger than the low bid. The RFP 02 Evaluation Committee met in March and narrowed the competing vendors to two finalists (the two that had submitted the lowest cost bids). These vendors were given a two-week window during which they were permitted to adjust, or fine-tune, their cost figures to account for any networking or ARRA-funded project developments that had occurred in the first quarter of 2010. The revised cost figures were received on April 15, 2010. One vendor did not make any significant changes to its bid, while the other—already the low-cost bidder—dropped its aggregate five-year operating costs by another 9%. On April 19, the Evaluation Committee chose the latter vendor, Great Lakes Comnet of East Lansing, MI, as the tentative winner.

1. Project Contact and Coordination Information

a. Identify the project leader(s) and respective business affiliations.

The Project Coordinator (PC) is Jeffrey Taylor, Executive Director, Michigan Public Health Institute (MPHI). The Assistant Project Coordinator (APC) is Jeff Shaw, Senior Project Manager, MPHI.

b. Provide a complete address for postal delivery and the telephone, fax, and e-mail address for the responsible administrative official.

The APC's (Jeff Shaw's) contact information follows:

Michigan Public Health Institute
2436 Woodlake Circle, Suite 300
Okemos, MI 48864
Telephone: 517.324.6055
Fax: 517.324.6086
E-mail: jshaw@mphi.org

c. Identify the organization that is legally and financially responsible for the conduct of activities supported by the award.

The Michigan Public Health Institute (MPHI) is legally and financially responsible for the conduct of activities supported by the award.

d. Explain how project is being coordinated throughout the state or region.

RFPs 00 and 01. RFPs 00 and 01 are being coordinated through TRHN's executive director. (As noted above, TRHN is a consortium of eight hospitals.) The hospitals are kept informed by TRHN's executive director.

RFP 02. The following narrative refers to RFP 02, the statewide RFP.

Initial recruitment of HCPs to participate in the project was approached on a regional basis using representatives residing in each of five rural Medical Trading Areas (MTAs) covering 80 percent of the state (excluding only the southeastern quadrant of Michigan's Lower Peninsula). These regional representatives were employed by health care facilities and knew or were familiar with the HCPs located within their respective MTAs. Once the bulk of the LOAs had been received, MPHI assumed the task of obtaining missing information and resolving paperwork problems.

Initially, the MTA representatives handled most of the communication with the participating HCPs. Coordination with the regional reps was managed by telephone, e-mail, and teleconferences. However, as the LOA collection process progressed, MPHI assumed more responsibility for communicating directly with the HCPs. As part of this effort, MPHI launched a website dedicated to the Michigan RHCPP: <http://fcc.mphi.org>.

Representatives of each MTA, the Michigan Department of Information Technology (MDIT), and the Michigan Department of Community Health (MDCH) formed an RFP 02 Review Team. The team met on a weekly basis, via teleconference, to develop and refine the RFP. Now that RFP 02 has been developed, this team will likely form the core of the Evaluation Committee that will review the responses to the RFP.

During the USAC site eligibility review process (early October 2008 through February 2009), MPHI coordinated the flow of data between USAC and the sites that applied for federal funding. MPHI submitted data to USAC in three batches: for the entire set of 551 sites in early October; for a third of the sites in mid-January; and, finally, for 37 sites in mid-February. USAC finalized the eligibility status of most sites (with three exceptions) on February 25, 2009. MPHI submitted 521 of these sites as part of its 465 package on November 4, 2009. By a letter dated November 6, USAC ruled three sites as ineligible for the federal subsidy. USAC posted the RFP on November 10. MPHI filed an appeal of the three ineligibility decisions on November 20. These appeals were resolved in March and April of 2010, with USAC ruling two sites eligible and the third site 33.2% eligible.

MPHI keeps the participating HCPs informed about the progress of the project. Examples of such activities follow.

- MPHI conducted a conference call with the regional representatives on April 14 and with the HCPs on April 17. Each regional representative and each participating HCP received a letter and an e-mail that summarized the project's history and invited them to attend the conference call.
- In late April, by letter, MPHI formally notified the participating health care providers (HCPs) of the results of the eligibility review. If any site was deemed ineligible for federal funding, the specific FCC rationale was provided.
- MPHI posts updates on the aforementioned Michigan RHCPP website. The last two updates were posted on June 22 and October 12, 2009.

- A personalized e-mail update was sent to all RFP 02 participants on October 12-13.
- A personalized e-mail was sent to all participating HCPs on December 16-17. This e-mail solicited a telephone number for each site that could be used to determine what telecommunications equipment served each location.

The Governor of Michigan, MDIT, MDCH, and Michigan’s Congressional delegation, all of whom are keenly interested in a successful implementation of the project, are being briefed on a regular basis. MDIT and MDCH officials are conferring with the APC and his project team on a bi-weekly basis.

On April 23, 2010, a package containing a letter detailing the next steps in the project, cost figures, and contracts were mailed to each of the points of contact for the 121 participating health care provider organizations.

2. *Identify all health care facilities included in the network.*
 - a. *Provide address (including county), zip code, Rural Urban Commuting Area (RUCA) code (including primary and secondary), six-digit census tract, and phone number for each health care facility participating in the network.*
 - b. *For each participating institution, indicate whether it is:*
 - i. *Public or non-public;*
 - ii. *Not-for-profit or for-profit;*
 - iii. *An eligible health care provider or ineligible health-care provider with an explanation of why the health care facility is eligible under section 254 of the 1996 Act and the Commission’s rules or a description of the type of ineligible health care provider entity.*

RFPs 01 and 02

Note: Public, as used here, means “owned by a local, state, or federal government.” USAC’s RHCPP Director and the RHCPP coaches have offered conflicting definitions of the term (most recently on an October 14, 2009, national conference call). Until USAC publishes clear guidance, we intend to continue to use this definition.

SITE	ADDRESS	CITY	COUNTY	STATE	ZIP CODE	CENSUS TRACT	RUCA	Public?	Non-profit	Pilot Eligible?	USAC "Eligible Entity TYPE"	Brief Explanation of Eligibility or Ineligibility	TEL.
Caro Community Hospital	401 North Hooper St.	Caro	Tuscola	MI	48723	9606.00	7.0	NO	TRUE	YES	5: Not-for-profit hospital	MI Nonprofit Critical Access Hospital	989-673-3141
Deckerville Community Hospital	3559 Pine St.	Deckerville	Sanilac	MI	48427	9704.00	10.6	NO	TRUE	YES	5: Not-for-profit hospital	Nonprofit community hospital	810-376-2835

Harbor Beach Community Hospital	210 South First St.	Harbor Beach	Huron	MI	48441	9512.00	10.6	NO	TRUE	YES	5: Not-for-profit hospital	MI Nonprofit Critical Access Hospital	989-479-3201
Hills & Dales General Hospital	4675 Hill St.	Cass City	Tuscola	MI	48726	9601.00	7.0	NO	TRUE	YES	5: Not-for-profit hospital	MI Nonprofit Critical Access Hospital	989-912-6275
Huron Medical Center - Bad Axe	1100 South Van Dyke Rd.	Bad Axe	Huron	MI	48413	9511.00	8.0	NO	TRUE	YES	5: Not-for-profit hospital	Nonprofit community hospital	989-269-8933

Scheurer Hospital - Hospital	170 North Caseville Rd.	Pigeon	Huron	MI	48755	9507.00	10.0	NO	TRUE	YES	5: Not-for-profit hospital	MI Nonprofit Critical Access Hospital	989-453-5202
Marlette Regional Hospital	2770 Main St.	Marlette	Sanilac	MI	48453	9710.00	10.6	NO	TRUE	YES	5: Not-for-profit hospital	Nonprofit community hospital	989-635-4001

RFP 02

RFP 02’s Form 465 Attachment currently lists 521 sites, although, at this point in time, this is merely a tabulation of the sites that have expressed interest in participating in the project. Nineteen of these sites have already been withdrawn, mostly because they are closed. We expect many more to withdraw when they evaluate the cost figures mailed to them on April 23, 2010. Ultimately, participation will be a function of cost. The requested data for the 502 candidate sites (minus the 19 withdrawn) is shown at Appendix A to this quarterly report.

Two sites are data centers that support multiple non-profit health care sites (Battle Creek Health System - Trinity Health Data Center, and Spectrum Health System-CTIS - Data Center). They are shown as “Pilot Ineligible” on the spreadsheet.

3. ***Network Narrative: In the first quarterly report following the completion of the competitive bidding process and the selection of vendors, the selected participant must submit an updated technical description of the communications network that it intends to implement, which takes into account the results its network design studies and negotiations with its vendors. This technical description should provide, where applicable:***

- a. *Brief description of the backbone network of the dedicated health care network, e.g., MPLS network, carrier-provided VPN, a SONET ring;*
- b. *Explanation of how health care provider sites will connect to (or access) the network, including the access technologies/services and transmission speeds;*
- c. *Explanation of how and where the network will connect to a national backbone such as NLR or Internet2;*
- d. *Number of miles of fiber construction, and whether the fiber is buried or aerial;*
- e. *Special systems or services for network management or maintenance (if applicable) and where such systems reside or are based.*

RFPs 01 and 02 – Tower Construction and Equipment. The TRHN is a consortium of eight (8) “Pilot Eligible” hospitals located in the thumb region of Michigan’s Lower Peninsula. The TRHN is expanding an existing, microwave tower-based, wireless network by adding four more towers.

(a) Brief description of the backbone network of the dedicated health care network. The TRHN is expanding an existing microwave, tower-based, wireless network by adding four more towers to the extant four towers and a ninth tower that will be leased. RFP 00 is in the process of constructing the four towers. RFP 01 purchased telecommunications equipment for all nine towers (one at each of the eight hospitals plus a centrally located hub tower). Long-range, wireless, point-to-point wireless “radios” will be mounted on each of the nine towers and provide direct, line-of-sight communication between pairs of towers/hospitals.

(b) Explanation of how health care provider sites will connect to (or access) the network. The radios will transmit data at 55 Mbps. They will be linked to their associated hospitals by means of Ethernet networking and Cisco switches and routers.

(c) Explanation of how and where the network will connect to a national backbone such as NLR or Internet2. The TRHN regional network will connect to the larger statewide project (RFP 02), the Internet, and Internet2 at two tower sites.

(d) Number of miles of fiber construction. Since this is a wireless network, fiber optic cable will not be used.

(e) Special systems or services for network management or maintenance (if applicable) and where such systems reside or are base. The wireless network will be monitored and managed using network monitoring (to be purchased by TRHN) and network management (Ipswitch WhatsUp Gold Premium) software running on a standard ProLiant Quad-Core Xeon server and under a Windows Server 2008 OS.

RFP 02 – Statewide Network. MPHI plans to build a network linking health care providers throughout Michigan (except for the southeastern urban area from Lansing to Detroit). This network’s backbone will link to Internet2 in at least two locations. Since the tentative winning vendor was chosen on April 19, 2010, information on the network design will be include in the June 30th quarterly Report.

4. **List of Connected Health Care Providers: Provide information below for all eligible and ineligible health care provider sites that, as of the close of the most recent reporting period, are connected to the network and operational.**
 - a. **Health care provider site;**
 - b. **Eligible provider (Yes/No);**
 - c. **Type of network connection (e.g., fiber, copper, wireless);**
 - d. **How connection is provided (e.g., carrier-provided service; self-constructed; leased facility);**
 - e. **Service and/or speed of connection (e.g., DS1, DS3, DSL, OC3, Metro Ethernet (10Mbps);**
 - f. **Gateway to NLR, Internet2, or the Public Internet (Yes/No);**
 - g. **Site Equipment (e.g., router, switch, SONET ADM, WDM), including manufacturer name and model number.**
 - h. **Provide a logical diagram or map of the network.**

At this time, some of the eight hospital members of the Thumb Rural Health Network (TRHN) are communicating with other TRHN members (RFPs 00 and 01). Since the network is expected to be fully operational by June 30th, rather than provide partial information now, the information for all eight hospitals will be provided in the June 30th quarterly report. No RFP 02 participants will be networked until the 4th quarter of 2010 at the earliest.

5. **Identify the following non-recurring and recurring costs,¹ where applicable shown both as budgeted and actually incurred for the applicable quarter and funding year to-date.**
 - a. **Network Design**
 - b. **Network Equipment, including engineering and installation**
 - c. **Infrastructure Deployment/Outside Plant**
 - i. **Engineering**
 - ii. **Construction**
 - d. **Internet2, NLR, or Public Internet Connection**
 - e. **Leased Facilities or Tariffed Services**
 - f. **Network Management, Maintenance, and Operation Costs (not captured elsewhere)**
 - g. **Other Non-Recurring and Recurring Costs**
 - **RFP 00** – MPHI has budgeted \$557,351.20 (both USAC & HCP shares) for tower construction. All of these costs will be non-recurring, and all will fit into category c above. By the end of April 2010, 7 invoices have been processed, and the RFP 00 phase of the project will be 75% complete:

¹ Non-recurring costs are flat charges incurred only once when acquiring a particular service or facility. Recurring costs are costs that recur, typically on a monthly basis, because they vary with respect to usage or length of service contract.

Invoice #	Incurred Costs (Invoice Amount)	HCP Payment	USAC Payment	Status of USAC Payment
88429	\$47,870.00	\$7,180.50	\$40,689.50	Paid
88522	\$104,746.20	\$15,711.93	\$89,034.27	Paid
88584	\$68,345.00	\$10,251.75	\$58,093.25	Paid
88622	\$36,141.00	\$5,421.15	\$30,719.85	Paid
88713	\$80,049.60	\$12,007.44	\$68,042.16	Paid
88739	\$38,620.00	\$5,793.00	\$32,827.00	Paid ~ 4/7
88822	\$40,857.00	\$6,128.55	\$34,728.45	Paid ~ 4/22
Totals	\$416,628.80	\$62,494.32	\$354,134.48	

- **RFP 01** – MPHI budgeted \$53,464.12 (both USAC & HCP shares) for network equipment. All of these costs were non-recurring, and all fit into category *b* above. The full amount of the FCL was incurred, the HCP paid 15 percent (\$8,019.62), and USAC paid \$45,444.35 to the vendor.
- **RFP 02** – Final budget data will not be available until the 3rd quarter of 2010, when the list of participating sites will have been finalized.

6. Describe how costs have been apportioned and the sources of the funds to pay them:

a. Explain how costs are identified, allocated among, and apportioned to both eligible and ineligible network participants.

RFPs 00 and 01. All eight (8) network participants are eligible health care providers (hospitals).

RFP 02. A project budget will be available once sites have committed or withdrawn based on cost figures provided in late April 2010 and the project costs have been adjusted by the tentative winning bidder. We expect this process to be completed by late summer 2010.

b. Describe the source of funds from:

- i. Eligible Pilot Program network participants**
- ii. Ineligible Pilot Program network participants**

RFPs 00 and 01. The source of the participating health care providers' 15 percent share is a HRSA grant obtained through their consortium, the Thumb Rural Health Network (TRHN). There are no recurring costs in this project; all costs are one-time construction or purchase.

RFP 02. A project budget will be available once sites have committed or withdrawn based on cost figures provided in late April 2010 and the project costs have been adjusted by the tentative winning bidder. We expect this process to be completed by late summer 2010.

- c. Show contributions from all other sources (e.g., local, state, and federal sources, and other grants).*
 - i. Identify source of financial support and anticipated revenues that is paying for costs not covered by the fund and by Pilot Program participants.*
 - ii. Identify the respective amounts and remaining time for such assistance.*

RFPs 00 and 01. There are no other sources of funds. If additional funds are needed, they will be provided by the TRHN consortium (hospitals themselves).

RFP 02. We do not expect to use any other source of funds. A project budget will be available once sites have committed or withdrawn based on cost figures provided in late April 2010 and the project costs have been adjusted by the tentative winning bidder. We expect this process to be completed by late summer 2010.

- d. Explain how the selected participant's minimum 15 percent contribution is helping to achieve both the selected participant's identified goals and objectives and the overarching goals of the Pilot Program.*

RFPs 00 and 01. The participants' 15 percent contribution is helping to pay for a telecomm network that is critical for inter-hospital communication.

RFP 02. A project budget will be available once sites have committed or withdrawn based on cost figures provided in late April 2010 and the project costs have been adjusted by the tentative winning bidder. We expect this process to be completed by late summer 2010.

- 7. Identify any technical or non-technical requirements or procedures necessary for ineligible entities to connect to the participant's network.*

RFPs 00 and 01. All network participants are eligible health care providers (hospitals).

RFP 02. This RFP has been posted.

- 8. Provide an update on the project management plan, detailing:*
 - a. The project's current leadership and management structure and any changes to the management structure since the last data report; and*

There has been no change from prior Quarterly Reports. For current project leadership, please refer to the response to question 1.

- b. In the first quarterly report, the selected applicant should provide a detailed project plan and schedule. The schedule must provide a list of key project deliverables or tasks, and their anticipated completion dates. Among the deliverables, participants must indicate the dates when each*

health care provider site is expected to be connected to the network and operational. Subsequent quarterly reports should identify which project deliverables, scheduled for the previous quarter, were met, and which were not met. In the event a project deliverable is not achieved, or the work and deliverables deviate from the work plan, the selected participant must provide an explanation.

RFP 00 – Tower Construction. A tentative project schedule follows:

- April 2009. MPHI submitted the FCC Form 465 package for USAC review. **COMPLETED**
- May 2009. USAC finalized its review and posted the RFP. **COMPLETED**
- June 2009. Vendors submitted proposals, and MPHI selected a winning vendor. **COMPLETED**
- July - September 2009. A contract was negotiated and signed. **COMPLETED**
- September 2009. USAC reviewed and approved the FCC Form 466A package. **COMPLETED**
- September 24, 2009. USAC issued the FCL. **COMPLETED**
- Late September 2009. Construction began.
- October 2, 2009. USAC issued a Support Acknowledgement Letter. **COMPLETED**

- December 2009 through June 30, 2010. Network equipment purchased through RFP 01 is mounted on the towers as they are completed.
- June 30, 2010. Construction is completed.
- June 30, 2010. All eight hospitals are linked to an operational network.

RFP 01 – Purchase of Network Equipment. A final project schedule follows:

- May 2009. MPHI submitted the FCC Form 465 package for USAC review. **COMPLETED**
- June 2009. USAC finalized its review and posted the RFP. **COMPLETED**
- July 2009. Vendors submitted proposals, and MPHI selected a winning vendor. **COMPLETED**
- August - September 2009. A contract was negotiated and signed. **COMPLETED**
- September 2009. USAC reviewed and approved the FCC Form 466A package. **COMPLETED**
- October 2009. USAC issued the FCL. **COMPLETED**
- November 2009. USAC issued a Support Acknowledgement Letter. **COMPLETED**
- December 2009. All equipment was delivered. **COMPLETED**
- December 2009. The HCP paid its 15 percent share to the vendor. **COMPLETED**
- January 2010. USAC paid its 85 percent share to the vendor. **COMPLETED**

- December 2009 through June 30, 2010. The equipment is installed, including mounting on the towers.

- June 30, 2010. All eight hospitals are linked to an operational network.

RFP 02 – Statewide Network

MPHI’s plan is one of the more ambitious among the 69 originally selected by the FCC for RHCPP support. MPHI plans to network as many as 500 HCP sites stretched across 80 percent of the state’s geography. Participants will be classified into four categories: Tier 1 (large regional referral hospitals), Tier 2 (other hospitals), Tier 3 (large clinics with five or more clinicians), and Tier 4 (smaller clinics). All HCPs will be connected to the Internet2 backbone. Connection throughput; the number of virtual private network connections; the locus of equipment management; the uptime, response time, and repair time requirements; and other features will vary by Tier, with the most robust service being provided to Tier 1 HCPs. It is not possible to provide expected connection/operational dates for the likely HCP participants, as the RFP is still posted.

A tentative project schedule follows:

- July-September 2008. The RFP was written; refined; and reviewed by a prominent telecommunications law firm. **COMPLETED**
- October 2008 – The RFP was finalized. **COMPLETED**
- November 2008 – USAC informally reviewed the RFP. **COMPLETED**
- October 2008 through February 2009 – USAC informally reviewed the eligibility of sites for FCC funding. **COMPLETED**²
- November 2009 – MPHI submitted the 465 package to USAC. **COMPLETED**
- November 2009 – The RFP was posted on the USAC website. **COMPLETED**
- ***February 2010*** – Vendor proposals are received. **COMPLETED**
- ***February - April 2010*** – The Evaluation Committee evaluates proposals and selects a tentative winning bidder. **COMPLETED**

- ***April 23 - June 7, 2010*** – Based on “estimated” cost data from the tentative winning bid, participating HCPs, by site, confirm their participation (by contract) or withdraw from the project.
- ***June 2010*** – A list of committed sites is compiled and provided to the tentative winning bidder.
- ***June - July 2010*** – The tentative winning bidder recalculates costs based on the list of committed sites and submits the “actual” costs to MPHI, which in turn communicates them to the HCPs. The HCPs have the right to withdraw a site if a site’s actual costs exceed its estimated costs by more than 10%.
- ***May - September 2010*** – MPHI negotiates a contract with the tentative winning bidder.
- ***September 2010***. MPHI submits the 466 package to USAC for its approval.
- ***September 2010 through 2012*** – The winning bidder builds the network, with HCPs connected in a serial manner as quickly as possible.

² A decision on one “administrative” site is still outstanding a year after the initial submission of data.

- ***1st year of network operation*** (timing will vary by HCP) – The monthly service costs during the first year of each HCP’s participation in the network are subsidized by RHCPP funds (85%), with the balance being paid by the HCP.
- ***2nd through 5th years of network operation*** – The monthly service rates paid by the HCPs were set by the original contract. The HCPs pay 100 percent of those costs.

9. Provide detail on whether the network is or will become self sustaining. Selected participants should provide an explanation of how network is self sustaining.

RFPs 00 and 01 – Thumb Rural Health Network

USAC Scenario. RFPs 00 and 01 are a best fit with USAC Scenario 5 – “Participant Shares Ownership of Dedicated Network with Other Network Members.” [I am defining “Participant” as one of the eight hospital members of the Thumb Rural Health Network (TRHN).] The TRHN, an RHCPP-eligible entity in its own right, is a consortium of eight RHCPP-eligible hospitals. The tower-based wireless telecomm system is being built for use by the eight hospitals. The TRHN network can stand alone, but when the larger statewide network is constructed (RFP 02), the TRHN network will connect to it and become an integral part of it. Depending on how terms are defined, if Scenario 5 does not apply, then either Scenario 1 or Scenario 2 would apply.

Sustainability Point 1 – source of 15 percent funding: The TRHN has already built four towers and is leasing a fifth. The RHCPP and a HRSA grant (nearly approved) will construct the last four towers to complete the network and purchase equipment to mount on all nine towers.

Sustainability Point 2 – commitment of network members: The TRHN’s eight member hospitals will own the wireless telecomm network, will use it for their exclusive benefit, and have demonstrated full commitment by funding the other five towers. There will be a need for hospitals in the foreseeable future, presumably they will continue to make money, and, given the geographic proximity and historic need to exchange data among the eight hospitals, the eight will continue to support the network. See also Sustainability Point 4.

Sustainability Point 3 – sustainability period: The TRHN has taken a long-term horizon and has made a major financial investment in this wireless telecomm network. Since it is impossible to predict how telecommunications technology will progress, a precise time period for usage cannot be offered. However, the TRHN is fully committed to this technology as long as it demonstrates competitive cost-effectiveness.

Sustainability Point 4 – budget: Once it has been built, the ongoing operating costs of this TRHN-owned network will be negligible (close to zero). Nonetheless, the TRHN and its eight member hospitals will be responsible for those costs. By means of a Memorandum of Understanding, each hospital is currently required to purchase insurance

for its co-located tower and the equipment mounted on it (a tower is located at or near each of the eight hospitals). The TRHN (the consortium itself) is required to insure the central (ninth) tower and its equipment. The TRHN is responsible for governance of the network. A lawyer hired by the TRHN is drafting a contract that will contractually specify the network-related insurance, operating, and other financial obligations of the TRHN and its eight hospital members.

Sustainability Point 5 – use of the network by non-eligible entities: None.

Sustainability Point 6 – network management: The TRHN consortium will manage the network. Personnel employed and paid by member hospitals will handle technical issues.

Sustainability Point 7 – Regular Program funding for the network: The eight TRHN hospitals are eligible to participate in the Regular Program. However, given the negligible ongoing operating costs and, due to its uniqueness, the low probability that the network would qualify for Regular Program subsidies of those costs, use of the Regular Program has not been discussed.

Sustainability Point 8 – federal funding: The TRHN will be using a HRSA grant to fund its 15 percent match. The grant is close to approval. However, if the HRSA grant is not approved, the TRHN has sufficient funds to pay the 15 percent match on its own, as the match for *both* RFPs 01 and 02 is less than \$92,000.

Sustainability Point 9 – prepaid lease option: Not applicable.

Sustainability Point 10 – up front charges and monthly lease charges: It is understood that invoicing cannot begin until installation/construction have commenced.

Summary: The TRHN will own the network. It will have been paid for. There will be annual maintenance costs, but they should not be significant. Presumably, given the frailty of the human body, there will be a need for hospitals for the foreseeable future. Therefore, to demonstrate a 10- to 15-year sustainability plan, it should be sufficient for the TRHN to specify full ownership and management, intent to use for the foreseeable future, and likely financial capacity to be able to maintain.

RFP 02 – Statewide Network

RFP 02's FCC Form 466-A package will not be submitted until September 2010. A formal sustainability plan will be submitted at that time. What follows is a preliminary outline of the expected approach to sustainability.

Overview. A project budget will be available once sites have committed or withdrawn based on cost figures provided in late April 2010 and the project costs have been adjusted by the tentative winning bidder. We expect this process to be completed by late summer 2010. Before addressing the factors that will result in the network

becoming self-sustaining, it is necessary to provide some background on Michigan's planned use of RHCPP funds. From the beginning, Michigan's plan has been to use the RHCPP grant to fund just the one-time (install) costs and the first year's ongoing (operating) costs. After that first year, sites will be responsible for funding the ongoing costs.

USAC Scenario. RFP 02 is a best fit with USAC Scenario ? – “xxx.”

Sustainability Point 1 – source of 15 percent funding: Each participating health care provider will be required to pay its 15 percent share.

Sustainability Point 2 – commitment of network members: Each participating health care provider will be expected to contractually agree to participate in the network for a minimum of five years. After the first year of operation, each HCP will be expected to pay 100 percent of the operating costs allocated to it. Prior to committing to the network, the HCP will be told about the expected costs so they can make an informed decision and budget accordingly. Those participants who are ineligible for the subsidy will be expected to pay 100 percent of the construction and operating costs allocated to their sites. They, too, will be informed about costs prior to committing to the project.

MPHI intends to negotiate a vendor contract that requires the vendor to stipulate service costs (by specific site) up front and maintain that cost structure for a minimum of five years. The economies of scale of negotiating a 500-site consortium will drive down the ongoing costs. In addition, the most heavily weighted proposal evaluation criterion will be the ongoing (post-RHCPP project support) cost to the participating HCPs. MPHI plans to use RHCPP funds to pay for the expensive capital investment up front and make the ongoing cost very affordable for the sites. It is expected that this cost will be less than what the HCPs are currently paying for Internet service or, if the RHCPP network costs are higher, that the network's additional benefits will outweigh the additional cost. (The state-wide health care network will be tailored to meet the *unique* requirements of the health care industry.)

Sustainability Point 3 – sustainability period: It is understood that the sustainability plan should cover a minimum of ten years, with 15 preferable.

Sustainability Point 4 – budget: A project budget will be available once sites have committed or withdrawn based on cost figures provided in late April 2010 and the project costs have been adjusted by the tentative winning bidder. We expect this process to be completed by late summer 2010.

Sustainability Point 5 – use of the network by non-eligible entities: MPHI does not plan to allow non-eligible entities to use the network. Approximately 12 percent of not-for-profit participants are ineligible for the FCC subsidy. In addition, there are approximately 33 for-profit participants. All are health care providers eligible to use the network.

Sustainability Point 6 – network management: The vendor will manage the network, and the cost will be part of the participants’ ongoing monthly service fees.

Sustainability Point 7 – Regular Program funding for the network: Most FCC-subsidy-eligible not-for-profit health care providers are eligible for the Normal Program. To help offset the network’s ongoing cost, after the first year of operation, eligible rural HCPs will be migrated from the RHCPP into the traditional USF Rural Health Care Program. To facilitate this, MPHI will be requesting that USAC grant “evergreen” status to the contract that results from Michigan’s RHCPP project.

Sustainability Point 8 – federal funding: The project plan does not assume that any state or additional federal funding will be used other than the FCC’s RHC Regular Program.

Sustainability Point 9 – prepaid lease option: Not applicable.

Sustainability Point 10 – up front charges and monthly lease charges: It is understood that invoicing cannot begin until installation/construction has commenced. Work on a site will only be invoiced after that site has gone live and has been formally accepted into the network by both the HCP and MPHI.

Summary: Michigan’s RHCPP is structured so that participating HCPs have to demonstrate a financial and operational commitment to the statewide network *at the onset of their participation*. They must commit funds to connect to the network and, in so doing, commit to use the network for their vital health care communications needs. After these initial commitments are made, the financial economies and the operational utility of the RHCPP-funded network should compel the HCPs to continue using it. The initial required commitments and the subsequent market-driven usage are the essence of sustainability.

10. Provide detail on how the supported network has advanced telemedicine benefits:

- a. Explain how the supported network has achieved the goals and objectives outlined in selected participant’s Pilot Program application;***
- b. Explain how the supported network has brought the benefits of innovative telehealth and, in particular, telemedicine services to those areas of the country where the need for those benefits is most acute;***
- c. Explain how the supported network has allowed patients access to critically needed medical specialists in a variety of practices without leaving their homes or communities;***
- d. Explain how the supported network has allowed health care providers access to government research institutions, and/or academic, public, and private health care institutions that are repositories of medical expertise and information;***

- e. Explain how the supported network has allowed health care professional to monitor critically ill patients at multiple locations around the clock, provide access to advanced applications in continuing education and research, and/or enhanced the health care community's ability to provide a rapid and coordinated response in the event of a national crisis.*

Given that no networks are fully operational, this section is not applicable at this point in time.

11. Provide detail on how the supported network has complied with HHS health IT initiatives:

- a. Explain how the supported network has used health IT systems and products that meet interoperability standards recognized by the HHS Secretary;*
- b. Explain how the supported network has used health IT products certified by the Certification Commission for Healthcare Information Technology;*
- c. Explain how the supported network has supported the Nationwide Health Information Network (NHIN) architecture by coordinating activities with organizations performing NHIN trial implementations;*
- d. Explain how the supported network has used resources available at HHS' Agency for Healthcare Research and Quality (AHRQ) National Resource Center for Health Information Technology;*
- e. Explain how the selected participant has educated themselves concerning the Pandemic and All Hazards Preparedness Act and coordinated with the HHS Assistant Secretary for Public Response as a resource for telehealth inventory and for the implementation of other preparedness and response initiatives; and*
- f. Explain how the supported network has used resources available through HHS' Centers for Disease Control and Prevention (CDC) Public Health Information Network (PHIN) to facilitate interoperability with public health and emergency organizations.*

Given that no networks are fully operational, this section is not applicable at this point in time. However MPHI, the State of Michigan, and the participating HCPs are well aware of the HHS health IT initiatives and intend to incorporate them, as appropriate.

12. Explain how the selected participants coordinated in the use of their health care networks with the Department of Health and Human Services (HHS) and, in particular, with its Centers for Disease Control and Prevention (CDC) in instances of national, regional, or local public health emergencies (e.g., pandemics, bioterrorism). In such instances, where feasible, explain how

selected participants provided access to their supported networks to HHS, including CDC, and other public health officials.

Given that no networks are operational, this section is not applicable at this point in time.

Completed by: Jeff Shaw, RHCPP Assistant Project Coordinator and MPHI Senior Project Manager, and Harry Levins, MPHI Project Manager, 04/23/2010

Appendix A

List of MI RHCPP RFP 02 Participating Sites as of March 31, 2010
