

The arguments made by advocates of so-called net neutrality regulations have been proven false by nearly a decade of experience since their concerns were first raised. The Internet is a remarkable free market success story, and the vast majority of Internet users are not clamoring for regulation. Self-styled consumer groups asking for regulation actually represent an extreme left-wing ideology that is hostile to free-market capitalism and puts its trust in government. That is not the position of the "grassroots" or most American Internet users. I urge you to reject new regulations and allow the free-market Internet to continue flourishing.

I am writing to express extreme concern and OBJECTION to your plan for "net neutrality" which I feel will stifle my right to free speech. I also feel it is an attempt to eliminate and silence any criticism of this administration by controlling internet content and attempting to silence your critics.

Any attempt to silence us will be perceived as an assault on my First Amendment Rights. The disdain that this administration holds for our Constitution, as I see it, is nothing short of treasonous.

The internet MUST stay as it is, free of any intervention by the government.

We have the RIGHT to read, speak and watch whatever we want to without the government trying to control the content. We have the right to seek out whatever we perceive to be the truth.

I know this administration doesn't believe one person can make a difference and they will try to silence any individual that does. Their disdain for talk radio and many of the conservative opinion shows has been blatantly made very obvious and I feel this will be a tool for them to use to attempt to silence the rights of those people. The very people who inform those of us that CHOOSE to listen or watch, because the mainstream media only gives one very limited view and they are all, as they say, on the same page. Our right to free speech MUST include alternative views and this administration would like to eliminate that right. You have no right to edit or tell us what we can or cannot listen to, read about or watch.

I can make a difference and there are tens of millions more who feel exactly as I do. If you attempt to control, shut down or limit the use of the

internet and it's content, which I believe is your true goal, we WILL find another way to find the truth and pass it on. We will not be ignored or intimidated by you or this administration.
