

Due to the worst economic status since the Great Depression, a deficit that will bankrupt this entire nation within a decade, and a government regime that is "attempting" to overpower the Bill of Rights, let alone the Constitution, "We The People" want to continue to declare our Freedom Of Speech, 1st Amendment, with any form that has been made plausible, including the Internet. The fact of the matter is, is that the very regulations that are being desired to be set into motion, are by the very people, that invented the system of internet usage in the first place, and its backfired on them.

(Non)Disclosure forms would have had to have been signed by each person that utilizes the internet all over the world in the beginning, and that is "virtually" impossible to do now, considering that not even a 'true' census count can be taken of the people that truly exist in the United States, let alone a 'legitimate' election count be produced, when it comes to a Presidential election, due to secret societies, 'under the table' deals, and behind closed door debates, on the so-called betterment of this nation.

Sabotages of the Tea Party Movement, for example, or an underhanded manipulation of peoples' livelihoods, such as my family and I, are at stake, and the individuals that are now standing as a unit, such as Glenn Beck or even Newt Gingrich, are merely speaking the honest truth, that this regime of the government has refused to communicate, to what is considered the "common" people; sheltering adults, like a parent would a child, but yet the children are being taught a very young age to follow the "leader".

'We The People' want to be heard, desire the truth, stand on moral conviction, and set standards for our communities. We want to be able to continue to do so, and believe that the very principles of the foundation of the positions that this regime is attempting to take away, will only continue to hurt the overall economy of many nations, enable the tyranny of the so-called bureaucracy, and limit the very foundation of what this beautiful nation, the United States of America was established upon, due to statute of limitations.

"We The People" rest on the notion that our nation is kept safe, from the very elements that are being taken for granite from our very own government. We want to know that We can take a stand regarding the issues that are of a moral imperative, and to not be taken lightly with regards, to our rights.

These are the very rights that so many families, people, or individuals came to this nation to have, will not stand idly by, and allow them to be taken away. Please be in contact with any questions.
