

I do not wish to see any changes to the current rules. I would encourage the served entities to make their needs known to their local clubs and have the local HAM communities support the served entities on a voluntary basis. Building a positive relationship between the HAM community and served entities serves both to the advantage of having experienced staff doing their job and having HAMs serving as communicators. Such would tend to encourage buy in of the community to support the needs of the community while protecting staff from another duty as assigned situation.
