

The FCC must reclassify broadband as a "telecommunications service" so that it can keep the Internet open and free of corporate gatekeepers.

Without vital Net Neutrality protections and the ability to enforce them, the Internet will cease to be a public platform for free speech, equal opportunity, economic growth and innovation. Instead, companies like AT&T, Verizon and Comcast, which have a commercial incentive to limit the free-flowing Web, will decide whose voices are heard.

The internet is a vital catalyst for positive, Human progress. In order for it to remain such an empowering tool of the People, it must remain free for everybody to use as they currently do. If you oppose an open, free internet, then you are declaring yourself an enemy of Human Freedom and benevolent progress. Inaction would suffice for such a declaration.

You still have the power to protect the public interest. Please stand with us and keep the Internet in the hands of the people who use it every day. Our future of Freedom depends on it.
