

What are the Information Needs of Communities & Citizens? Like the rest of the country we are descending into the dark ages where there is lots of fear peddling and sensationalism but no real communication on a community level. we have been entertained to sleep while who knows what is being done.

How is Commercial Media Serving Your Community?

There is no commercial media news only entertainment in my community. I live 2 miles out of New York City.

What is the State of Noncommercial, Nonprofit, and Public Media?

Fortunately I can get BBC News and NPR radio. Friends send me news from Germany.

Just as there used to be a Radio Free Europe sending news to Eastern Europe, I think the American public needs a radio Free America from off shore filling us in on what is really going on.

What is the Impact of the Internet and Mobile Information?

the internet is still young and used by the young. while it is free we have a chance to really have a dialogue about what is going on in our world and take actions as individual citizens. It is vital that the internet remain open to everyone because as we have lost our voice in the commercial media the internet is our only hope.
