RE: MB Docket No. 10-56

Dear Chairman Genachowski:

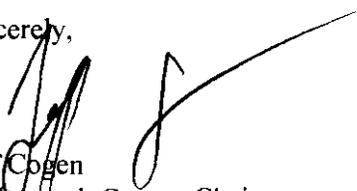

Multnomah County is geographically the smallest in Oregon, yet, with a population of over 700,000, it is also the most populous. Portland, our state's largest city, is our county seat and we are well informed thanks to Comcast, as it provides Video on Demand access to public programming providers serving Portland and the greater Portland area.

Comcast Cares Day is like a holiday for us. Last year, on April 25<sup>th</sup>, Comcast's employees, friends and families worked together on several sites in the Portland area, including the Community Cycling Center, the Hacienda CDC, James John Elementary School, Marquam Park, and the Oregon Humane Society and The Hoyt Arboretum. Sites were painted, landscaped and cleared of invasive vegetation. It was a great project that reinforced all of our positive feelings about Comcast.

Even those who choose not to use Comcast's cable or internet services still benefit from its presence in Multnomah County. That is because Comcast is a good corporate citizen that acts with our community's welfare in mind.

As you consider whether to approve the Comcast and NBC Universal venture, I want to be a strong voice for Comcast as a model corporate citizen. Please feel free to contact me with any questions.

Sincerely,

  
Jeff Cogen  
Multnomah County Chair
