

Comment on RM-11599:

I, Andrew Palmquist, General Manager of standard broadcast radio station KKXX, 930 KHz, Paradise, CA, request that the Commission adopt RM-11599 which would permit pre-sunrise power of up to 500 watts under Pre-sunrise Authorization commencing at 5:00AM for stations operating on regional channels. Earlier operation with higher pre-sunrise power commencing at 5:00 AM will allow KKXX to provide greater service during the early morning than is currently realized with our drastically reduced nighttime power of 37 watts. And will facilitate a better programming overall, by allowing for listenable signal where otherwise there currently is little to none of the signal reaching our Service Area at the 5:00 AM hour.

CERTIFICATE OF SERVICE:

I, Andrew Palmquist, certify that I forwarded a copy of this Comment on May 5th, 2010 via email to the Petitioner Richard F. Arsenault at the following email address: radioservices@ieee.org

Sincerely,

/s/

Andrew Palmquist
