

What are the Information Needs of Communities & Citizens? We have a power plant built on and near fault lines, We have relatively good systems set up to alert us if there is a problem. Public radio and Alarm system through out the community. Our local county superintendts meetings are broadcasted live on Public Radio! Local TV owned by CBS & NBC Fox, not very open minded.

How is Commercial Media Serving Your Community?

Not well, it is mostly senationalized

What is the State of Noncommercial, Nonprofit, and Public Media?

We have a great local Public Radio Station KCBX. Although they are apparently influenced as well, recent terror attack was so broadcasted before the man even had a trial. They had quickly tied him to Al Queada, with out even having the facts!!

What is the Impact of the Internet and Mobile Information?

News is available beyond the big and few corporations but difficult to find. If one is not looking, the only thing available is whats being pushed down our throats. Often very biased and incomplete especially if it does not fit in with our administrations vision of what we should know about. China is a bit more extreme but I seriously think we are not far behind. Censorship is huge through out the world and we are coming up/down to the same standards...
