

Please don't close the VRS centers, where would the equality and access be if we closed them? Oftentimes companies hang up on TTY calls while illegal affects deaf consumers access to important daily things. This is what makes VRS so unique and important it provides instant communication to all parties and a more fluid communication than that of TTY calls. This would also affect the workforce that would have to be fired. Just don't do it please don't cut VRS.
