

To Whom It May Concern:

It was brought to my attention that FCC may not provide assistance in providing services for the Deaf and Hard of Hearing by using videophone (especially Sorenson VRS) in the Deaf and Hard of Hearing community. We use the services to maintain every day calls with relatives, medical providers and important collaterals. It would greatly impact us when we lose those services to bridge communication between the Deaf and hearing community. It saddens me that after many year advocating to our community about using videophone to find out that the freedom to communicate is now limited. I need explanation to this decision and would like to know what we could do to keep the service running.

Thank you,

Lee Anne
