

The FCC proposed 40% cut to reimbursement to Sorenson Communications will bankrupt them. Sorenson is the largest company and controls 80% of the marketplace. The other 20% of the market place is not large enough, does not have the technology, nor the staff to provide service for the 80% of Deaf and Hard of Hearing consumers now left without service. The FCC will not fund services that do not answer phone calls in under 2 minutes. These other companies would not last one day in the marketplace without Sorenson. Thus Video Relay Services would no longer exist. Please reconsider this proposal.
