

I really want to keep Sorenson VP200 and the SVRS. It is easier to communicate. The qualified Interpreters can understand me clear and there is no misunderstanding. TTY is not a good source for communication because a lot of the times people do not understand the language. I cherish Sorenson and by lowering the rate you will force Sorenson into bankrupt and by so doing cutting off all Deaf communication. Seriously Sorenson VP200 is the first and only way to go. We can easily call for Doctors, dentist anything and the skilled Interpreters understand and there is no confusion like on the TTY. Also I have many hearing friends that use SVRS and they love being able to communicate with me in a smooth natural way. I cherish Sorenson and I know all Deaf will be upset if Sorenson is not around. This is the reason for my letter to maintain fair communication. I love Sorenson.
