

I wish every Deaf person could have been present at the FCC hearing to hear other Deaf person talk about Deaf rights. It would be the most empowering moment in the nation. At the same time, it made me realize how far is the divide between the limitation communication in tty/tdd and the successful method if using Videophone equipment towards the quest of achieving Deaf communication rights.

Now, with the current proposal being made. This will definitely put entire Deaf community into the dark ages on communications. This will prevents Deaf community from achieve on their communications across to another community. Once again, we shall not let you prevails on us.
