

FCC plans to make drastic cuts to VRS that would be devastating for the Deaf. This will cause many company's to lay off employees or even worse close completely. This is simply unacceptable. As a member of the Deaf Community, I feel you will be doing a great disservice to all of us. I know that the economy has its shortfalls, however these cuts will only increase the deficit by putting more interpreters out of work and limiting the way our community communicates. Please reconsider.
