RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

I represent Richland County's second district in South Carolina and constantly look for ways to empower and develop our neighborhoods. Our economy has been hit hard, but I believe that through hard work and investment by companies like Comcast, we can get America back on track. I know that you are currently reviewing the Comcast-NBC joint venture and hope that you will permit the companies to move forward with the transaction.

We need to make sure all Americans have access to high-speed Internet. Broadband allows Americans to look for jobs and develop 21<sup>st</sup> Century skills. It gives young adults new educational opportunities through distance learning. Social networks keep friends and families connected around the world and stimulate community involvement.

Comcast is dedicated to making broadband accessible in South Carolina and across the country. The company has spent \$\_\_\_ here in South Carolina to provide broadband to many communities. The company also enriches our community through programs, such as Cable in the Classroom, that provide teachers, children and families with valuable resources, including high-speed Internet and online programming content.

Comcast is a true community advocate that strives to go beyond just providing services. I hope you will consider its efforts while reviewing its venture with NBC.

Sincerely,

A handwritten signature in black ink that reads "Joyce Dickerson". The signature is written in a cursive style with a large, sweeping flourish at the end.
