RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

The Boston Public Library's mission is to preserve and provide access to our society's historical record and to serve the cultural, educational, and informational needs of Boston and the Commonwealth of Massachusetts. We wanted to make you aware of Comcast's active partnership with our library and positive record in promoting literacy both online and in the classroom.

Comcast has helped the Boston Public Library by supporting our after school homework assistance efforts. The company has also provided several complimentary high speed Internet connections to our libraries that have expanded our ability to serve our patrons.

As librarians, we hope to touch the lives of every Bostonian in our libraries, on the Internet and in the community. Comcast's contribution helps us to accomplish this vision.

Most sincerely,

  
Amy Ryan, President

Koren Stembridge  
Director, Partnerships & Communications
