

If the function of the FCC is to protect the public airwaves and to make it possible to have an informed public through a functioning democracy not controlled by a handful of mega-corporations, then:

PLEASE DO NOT PERMIT THE MERGER OF COMCAST AND NBC.

It serves no function that is in the public good. These corporations have already made out like bandits using our public trust--our public airwaves--and they need not consolidate their power to cut more jobs from our economy and further dominate the bully pulpit advantage in controlling a large portion of the mainstream media.

I support Michael Cobbs of the FCC who recognizes that the role of the FCC is to protect the people--not the corporations.

Thank you for listening. . . .
