Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

The Dow Chemical Company

June 7, 2010

Re: MB Docket No. 10-56

Dear Chairman Genachowski:

As a member of the telecommunications community and a longtime Comcast customer, I would like to express the strong support of my company, WTL Communications, Inc., for the joining of Comcast and NBC Universal.

WTL Communications, based in Bay Harbor, Michigan, provides telecommunications support to large-sized businesses at the National Account level. Since we began using Comcast Business Services, I have seen firsthand how Comcast has grown, and helped improve the way that we communicate and share information. Comcast has been a major player in the information revolution, pushing the boundaries in an attempt to provide the best possible product to its customers and partners.

WTL works with over 100 vendors across North America, and without a doubt, Comcast's High Speed Internet and Teleworker products are the best that we have encountered. Just as important, its customer center and staff are extremely well trained and professional, able to assist promptly with any and all problems that we may encounter in a quick and timely manner. The level of service and professionalism is truly unmatched.

WTL Communications is proud to be a Comcast customer and looks forward to the exciting advances a Comcast and NBC Universal partnership may bring. As such, I urge the FCC to approve this partnership.

Sincerely,

Julie Levy 
CEO, WTL Communications, Inc.
