

June 8, 2010

The Honorable Julius Genachowski
Chairman
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Re: MB Docket No. 10-56

Dear Chairman Genachowski:

As mayor of Parker, Colorado, I appreciate Comcast's focus on the needs of our 48,000 residents and I am writing to support its plans to partner with NBC Universal.

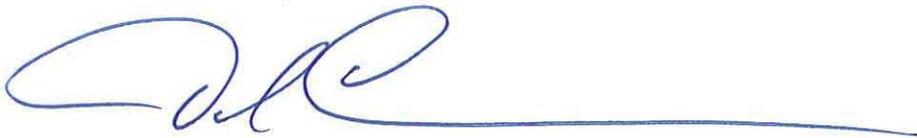

Parker was founded in 1864, but did not become a municipality until 1981. We are located 20 miles southeast of Denver and encompass nearly 19 square miles of some of the most awe-inspiring land in the United States. Our town is committed to maintaining a friendly warm atmosphere and our core values include teamwork with encouragement for creativity and individual initiative.

I believe that Comcast shares our core values. Not only does Comcast provide high-quality internet, television and telephone services to its customers, but it is actively engaged in the life of our small community. I have been a guest on Comcast's local Newsmakers program several times to discuss matters of civic importance. Comcast also was a premier sponsor of our first State of the Town Address. As a true indication of Comcast's community spirit, Comcast used its sponsorship of that event to host several outstanding high school students at its table.

Through my participation in the Denver Regional Council of Governments and the Metro Mayor's Caucus, I know that Parker is not alone in benefitting from Comcast's commitments to the local communities it serves. Comcast's success has provided local business leadership, charitable donations and volunteer service, steady employment and important tax revenues.

Comcast has long been locally committed to Parker and stands out as a company that shares our core values. Therefore, I am asking you to approve its request to join with NBC Universal.

Sincerely,

David Casiano
Mayor
Parker, Colorado

Cc: Commissioner Michael J. Copps
Commissioner Robert M. McDowell
Commissioner Mignon Clyburn
Commissioner Meredith Attwell Baker
