The Honorable Julius Genachowski
Chairman, Federal Communications Commission
445 12th Street, SW
Washington, DC 20554

Re: MB Docket No. 10-56

Dear Chairman Genachowski:

On behalf of the United Way of Lebanon County in Lebanon, Pennsylvania, I am writing to express my support of Comcast and its proposal to join with NBC Universal. The United Way of Lebanon County has been the beneficiary of Comcast's extraordinary local commitment for many years. We truly value our partnership.

My organization works to improve lives by supporting and maximizing community resources. Many programs in Lebanon County depend on us to raise the funds and provide the support to sustain their operations. In these difficult times, executing our mission is harder than ever. Because of reliable partners like Comcast we are meeting needs and making services available to our neighbors. We cannot thank Comcast enough. Without its critical support we would struggle to maintain access to after school programs for our youth, financial counseling for families and support programs for those in crisis. From our perspective, Comcast is a part of the solution in Lebanon County.

Comcast is also a tremendous source of volunteer resources for the United Way Day of Caring. It also hosts its own large-scale volunteer effort called Comcast Cares Day. Because the two events fell on the same day this year, Comcast, United Way and Habitat for Humanity joined together to create a community vegetable garden in a previously vacant city lot. Thanks to Comcast employees' volunteer efforts more than 40 low-income families will enjoy fresh vegetables throughout the growing season. The company has committed to expand and improve the site next year. Furthermore, Comcast is always doing what it does best. It provides courtesy internet services to many of our schools and libraries.

Through the support of partners like Comcast, the United Way of Lebanon County can fund 35 different agencies and programs in our area that provide much needed services for our friends and neighbors. We cannot adequately explain what that means to us and our community members locally. I hope the FCC will consider Comcast's investment in the communities it serves and our support for the Comcast and NBC Universal partnership in its review.

Sincerely,

Emily Williams
Director of Campaign & Communications, United Way of Lebanon County
