Re: ***EX PARTE NOTICE***

Unlicensed Operation in the TV Broadcast Bands, ET Docket No. 04-186;  
Revision to Rules Authorizing the Operation of Low Power Auxiliary Stations in  
the 698-806 MHz Band, WT Docket Nos. 08-166 and 08-167;

Dear Ms. Dortch:

On June 9th, 2010, Shure Incorporated (“Shure”) met with Paul de Sa, Chief of the Commission’s Office of Strategic Planning & Policy Analysis to discuss ET Docket No. 04-186 and WT Docket Nos. 08-166 and 08-167. Attending this meeting on behalf of Shure were Mark Brunner, Senior Director, Global Public Relations, Edgar Reihl, Principal Engineer, and Catherine Wang of Bingham McCutchen LLP, outside counsel to Shure.

During this meeting Shure discussed several issues of critical importance to the wireless microphone community pending on reconsideration before the Commission in ET Docket No. 04-186. Shure reemphasized its belief in dynamic access and responsible frequency sharing, and expressed continued support for proven real-world technologies that advance these goals. Specifically:

- Shure urged the Commission to recognize the public interest value and highly varied use models of wireless microphones as it contemplates long-term changes in spectrum regulation.
- Shure provided background regarding why spectrum sensing remains an important interference avoidance mechanism that complements geolocation database technology.
- Shure discussed the need for expanded wireless microphone license eligibility to ensure protection for wireless microphone operations in the geolocation database

- Shure emphasized why classifying sensitive wireless microphones as co-equal with Part 15 devices that tolerate significant interference is not a workable interference protection approach.
- Shure also provided its view on a number of developments concerning cognitive radio technology.

If you have any questions regarding this meeting, please do not hesitate to contact the undersigned.

Very truly yours,

/s/

Catherine Wang
