Re: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

At the Boys & Girls Club of Trenton, New Jersey, our mission is to inspire and enable all young people, especially those from disadvantaged circumstances, to realize their full potential as productive, responsible and caring citizens. We provide our members a safe learning environment where we expose them to educational options as well as potential job opportunities. We are also proud of the relationships that we have built with our outside supporters in the private sector – in particular, committed companies like Comcast.

Notably, Comcast has always understood what the Boys & Girls Club is trying to achieve as an organization. Our longest serving Board member and past Board President is a Comcast executive and we have worked closed with other Comcast employees during the volunteer opportunities provided by Comcast Cares Day.

The Internet has become a vital component both for schools and businesses. As an organization that tries to encourage job training, it is essential that we have access to high-speed Internet. Comcast has enriched our surrounding area by offering high speed broadband services to our residents and businesses. Comcast has also stepped up to the plate by offering free broadband services to our public schools and community organizations so that all of our children, no matter what their background, have access to world wide web.

Comcast is a company that not only delivers fundamental services but also helps our organization flourish and grow. We support its upcoming joint venture with NBC Universal and look forward to a long and fruitful relationship.

Sincerely yours,

David Anderson, Executive Director
Boys & Girls Club of Trenton
