Washington, DC 20554

Re: MB Docket No. 10-56

Dear Chairman Genachowski,

As you prepare to review the transaction between Comcast and NBC Universal, I wanted to voice the Florida State Chamber of Commerce's support for the proposal.

Comcast and NBC Universal are two of Florida's strongest employers and revenue generators. NBC Universal alone employs 13,500 people at the center of its business operations in Orlando, while Comcast employs 8,000 and has spent over \$280 million in State and Local taxes to date.

Comcast and NBC Universal have also been strong partners of the Florida State Chamber. They understand that all business is local and have helped us to create a climate that not only sustains but also encourages economic development here in Florida.

However, the main reason we ask you to approve their joint venture is that Comcast's and NBCU's success is important to Florida and Floridians and the deal will make both stronger. Comcast is an entertainment and communications company first and foremost. Combining Comcast, a well-managed and stable media distributor, with NBCU, a great American broadcasting company, will position both for success in the 21st century here in Florida.

As Florida's advocate for business, we respectfully ask you to keep our perspective and these facts in mind when considering a joining of these two entities. Comcast and NBC Universal are already two very important members of our state's business community and will most certainly maintain and grow that trend should their transaction be approved.

My best,

A handwritten signature in black ink that reads "Mark Wilson".

Mark Wilson
President and CEO
