

DECLARATION OF PHIL KIDNER

I, Phil Kidner, hereby declare, under penalty of perjury under the laws of the United States of America, that the facts set forth herein are true and correct to the best of my knowledge and belief.

1. I am Chief Executive of the TETRA Association (“Association”), located at 14 Blandford Square, Newcastle upon Tyne, NE1 4HZ, UK. The Association was formed in 1994 to promote the use of TETRA technology, which standards have been developed by the European Technical Standards Institute (“ETSI”). The Association represents more than 150 organizations from 37 countries that are involved in the development, deployment and use of TETRA technology.
2. In my position, I am familiar with and have access to information from the Association’s members regarding deployment of TETRA systems and devices worldwide. According to records kept by the TETRA Association up until 2008, as well as information obtained from subsequent press announcements, TETRA systems have been implemented in 117 countries worldwide in a variety of market segments. As far as I am aware, none of these countries impose restrictions on available technology and the TETRA contracts would have been awarded where users had the freedom to choose other PMR and cellular technologies. This is the normal situation throughout the world.
3. Attachment 1 to this Declaration lists more than 2,000 contracts that the Association is aware have been awarded to TETRA manufacturers up until 2008. Not all manufacturers provided the Association with this information, so the list is an underestimate of the actual number of contracts. In certain cases, the customer or manufacturer has requested that contract information remain confidential, and that is indicated on the list; in other cases, the manufacturer has not identified the customer, in which case the “Contract or Customer Name” column has been left blank.
4. Attachment 2 to this Declaration is a summary from available press releases of more than 100 TETRA contracts that have been entered into since the beginning of 2008. Again, because this information is based on a survey of publicly-available information, the Association believes this is an underrepresentation of the number of contracts actually awarded.
5. While the Association recognizes that public safety users in the United

States have adopted P25 as their standard, internationally public safety entities are by far the largest users of TETRA equipment and TETRA is the technology of choice by many public safety users. Thus, the Association is also providing Attachment 3, which lists more than 80 countries in which TETRA is being used by public safety. The public safety contracts are in addition to the contracts listed in Attachments 1 and 2, which only cover non-public safety users.

6. Together, the attachments provide a view of the wide-spread demand for TETRA by users around the world.

I declare under penalty of perjury of the laws of the United States of America that the foregoing is true and correct to the best of my knowledge and belief.

Executed on June 7, 2010.

A handwritten signature in black ink, enclosed in a rectangular box. The signature is cursive and appears to read 'Phil Kidner'. There is a horizontal line above the signature box.

Phil Kidner
