Re: MB Docket No. 10-56

Dear Chairman Genachowski,

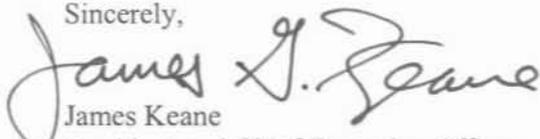

As a supporter of the needs of consumers, I know you will take a great deal of interest in the Comcast-NBC Universal joint venture. I also hope you will take the time to take into account the views of citizens who have benefited from Comcast's positive work in our communities.

As you likely know, Boys and Girls Club of Chicago works to build young people up by helping them increase their self-esteem and develop leadership skills. We work to promote positive life choices in a safe learning environment through trusted programs and services in five core areas: character education and leadership development; education and career development; health and life skills; the arts; and, sports, fitness and recreation.

Comcast has been strong supporters of Boys and Girls Club of Chicago and is an essential partner in our programs. They have reached into our community in ways that some other businesses do not. Their executives have made clear to us through their efforts that they see themselves as neighbors, not just a company that has customers here. It's a critical difference and one that is greatly appreciated.

Recently Comcast worked with our Yancey Boys & Girls Club in Englewood and provided over 150 volunteers to clean-up the facility, paint and landscape on their annual Comcast Cares Day. Additionally, on Comcast Cares day, volunteers wired the entire facility with complimentary phone, television and internet services and the Comcast Foundation provided a grant for \$25,000. These efforts are tremendously impactful to this particular club in an especially high-risk neighborhood. Comcast's dedication to the Boys & Girls Clubs of Chicago is simply remarkable..

I think you will find in Comcast a company that cares for your communities' interests as well. Thank you for taking the time to consider my views.

Sincerely,  
  
James Keane  
President and Chief Executive Officer
