RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

It is important to highlight companies that are active corporate citizens. I am writing to you today to talk about Comcast and its tremendous efforts that help build our state on a daily basis.

I have represented the 57th House District of Indiana House's of Representative since 2006, which encompasses Bartholomew and Shelby Counties. Besides serving my state, I have also been a small business owner. Small business owners face so many challenges in our tough economy but the biggest challenge will always be to remain competitive, and technology is critical to this effort. Without broadband, small business owners are not able to utilize the many features that come along with it, such as money-saving voice over Internet services, supplier portals and virtual meetings. I have greatly appreciated Comcast's efforts to expand broadband availability and speeds.

Additionally, Comcast has invested in Shelby and Bartholomew Counties by partnering with local organizations to give back directly to the constituents. For example, Comcast works closely with the Shelby County United Fund, Inc. as well as with Habitat for Humanity Shelbyville.

I hope you will support the partnership with NBC as I believe the combined entities would bring even more opportunities to communities like ours.

Sincerely,

Sean Eberhart
State Representative
District 57
