

We need viable, fair competition with internet service. It must be top notch (on a world scale) and inexpensive. The dreck that Comcast service (and others) provides is overpriced, under delivered, and anticompetitive. We as citizens and as a nation need and deserve far better. Stop listening to the providers, their lobbyists and assorted cronies. Give America and its citizens the service and tools it needs to keep us competitive and leaders in the world. When the public gets screwed, America gets screwed. Regulate equality for all.

Do to Comcast (&etc) what you did to Ma Bell. Then we all win!
