**Re: MB Docket No. 10-56**

Dear Commissioners:

I am writing on behalf of the Pennsylvania State Association of Boroughs (PSAB) to register my support for the **Comcast-NBC Universal partnership**. Our group represents 910 boroughs and more than 9,800 borough officials dedicated to the delivery of quality leadership and services to the more than 2.5 million borough citizens across the Commonwealth. Our group is proud of its association with Comcast because the company shares our commitment to Pennsylvania's communities.

For the last five years Comcast has demonstrated its corporate citizenship through support of our major educational conferences and training seminars. Comcast officials are always on available to explain the latest technology to our membership and share the ways advanced telecommunications can enhance quality of life in their communities.

I have been impressed by Comcast's generosity in providing free internet and cable services to countless borough and municipal buildings as well as schools, libraries and community centers. *These services are invaluable in that they keep even our smallest communities connected and functioning.* I am also aware of Comcast's significant philanthropic contributions, its volunteer efforts and scholarship programs. Comcast goes beyond most companies and takes a genuine interest in, and makes a significant investment in, the communities in which it operates.

I am hopeful you will take these factors into consideration as you move through the decision making process. As you do, please remember our members and the citizens they serve are better off because of Comcast. Should you wish to discuss this issue in detail I can be reached at [etroxell@boroughs.org](mailto:etroxell@boroughs.org) at your convenience.

Sincerely,

Edward C. Troxell  
PSAB, Director of Government Affairs
