RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

The Literacy Council works to combat high levels of illiteracy through our own advocacy work and outreach. Too many adults and children have been neglected and we make it our priority to help them. The reason we are writing to you today is to praise Comcast for its work in digital literacy campaigns.

Comcast has taken a proactive approach to digital skill building by launching various educational programs as we move toward a 100% digital society. From bill paying to grocery shopping, it is important that our youth as well as adults learn about these new features.

This is a company that is truly concerned about its customers and goes beyond simply delivering services. They helped our organization with a generous grant from the Comcast Foundation. We support their growth and look forward their work with NBC.

Thank you,

John Hurley
Executive Director
