Washington, DC 20554

RE: MB Docket No. 10-56

March 11, 2010

Chairman Genachowski:

I am writing on behalf of Latino Memphis - one of the largest support groups for Hispanics living in Memphis, Tennessee. Our organization would like to offer support on behalf of Comcast and its plan to merge with NBC Universal.

Latino Memphis strives to develop partnerships that enable Latinos to overcome serious societal obstacles. To do that our organization provides health care, education and employment services and youth leadership initiatives.

Achieving our goals requires support from dedicated corporate partners that share our vision. Latino Memphis has found that partner in Comcast.

We are operational today thanks to a generous grant from the Comcast Foundation. That money enabled us to achieve financial security at a crucial time in our existence. Furthermore, Comcast demonstrated its commitment to community diversity when it teamed with Terra.com to launch "Comcast Latino," a broadband portal offering Spanish content to high-speed internet customers. This service illustrates Comcast's commitment to provide content reflective of its customers. It also proves the company shares our goal of eradicating the obstacles that impact the Latino community.

Finally, last year Latino Memphis proudly joined forces with Comcast employees, their families and friends on Comcast Cares Day - together we participated in a day of service to work on various projects designed to improve our neighborhoods. We hope to repeat the effort again this year.

As you review the proposed merger agreement please remember that strong partnerships can be good and positive. We urge you to support this transaction.

SJJ::~

Mauricio Calvo  
Executive Director.
