COMMENTS OF MOTOROLA, INC.

Motorola, Inc. (“Motorola”) welcomes the opportunity to express its support for the proposed Comcast-NBCU joint venture.

Comcast has long been a leading innovator in the multichannel video marketplace. Its networks deliver to consumers hundreds of channels of high-definition and other digital programming and thousands of video-on-demand selections. It also is an industry leader in the deployment of DOCSIS 3.0 broadband service. As the Commission has recognized, the growth of high-speed broadband has made the Internet the most dynamic information and communications tool the world has known. Comcast’s continuing investment in ever-faster high-speed Internet service will continue to advance the Commission’s broadband goals.

Comcast is now offering the next generation of innovative services. It has deployed TV Everywhere, which enables consumers to access video content where and when they want it on PCs and other consumer devices. It fully demonstrated the potential of 3-D television with its recent telecast of the Masters golf tournament. It has worked closely with Motorola in deploying the Enhanced TV Binary Interchange Format (“EBIF”), an interactive TV technology that provides a platform for new interactive TV applications for digital customers.

Motorola has been a proud partner with Comcast in launching many of these products and services, which have benefited millions of customers, and believes that the Comcast-NBCU joint venture will provide many new benefits to consumers. Motorola shares Comcast's strong commitment to enabling ever greater customization of the user experience. The proposed Comcast-NBCU joint venture will accelerate that shared objective. It will allow the companies to bring more content to consumers across a variety of distribution platforms, and hasten the arrival of the "anytime, anywhere" future of video that U.S. consumers want.

Motorola believes that the proposed Comcast-NBCU joint venture will have significant public interest benefits, and urges prompt Commission approval of the venture.

Respectfully submitted,

/s/ Jason E. Friedrich
