RE: MB Docket 10-56

Dear Chairman Genachowski:

I am an employee of Comcast. I am writing this personal letter to you in hope that you will support the historic venture between GE and Comcast to form a new entity to manage the asset of NBC Universal and Comcast's family of programming. When I learned of the deal, I was very excited about the opportunity this will bring to the community, the companies involved in the deal, and employees of the companies involved.

For the community, I see a bright future where there will be a lot more content that will be available for free either through the internet or through customer's set top box via on-demand. As you might know, Comcast is very involved with the community with such example as their annual United Way drive and Comcast Care Days. The company also encourage employee to contribute to the community when they are off work. Through company's encouragement, I joined Organization of Chinese American and became their Vice President of Economic Development and a member of the board for their Greater Sacramento Chapter.

For the companies involved, the new entity will leverage and share best practices. They will explore the technology development between them, break new grounds, and shorten time between product development and delivery to customer's home.

For the company's employee, there will be a lot more advancement and training opportunities. Folks will not be limited to one industry and/or one career. There will be greater opportunity for employee to choose where they want to live and what they want to do.

Please make the right decision by supporting this historic venture.

Sincerely,

Sam Ng
