Re: MB Docket No. 10-56

Dear Chairman Genachowski,

Raymond, New Hampshire is a small town located in the southern part of state that embodies the best of small town America. We are a tightly knit community that embraces innovation and welcomes new business and development that betters our Town as a result.

The purpose of this letter is not to tell you about all the accomplishments of Raymond, but my support of the Comcast/NBCU partnership. Comcast is an industry leading communications service provider and a committed local partner to the Town. Just last year over fifty (50) Comcast employees volunteered their time to plant trees, restore flower gardens, and perform an overall clean up of Riverside Park located here in Raymond. Three years ago during a major storm the Town's communication network was knocked out. Comcast responded by offering free phone service to our Police and Fire Department. Comcast has delivered on its promises of system up-grades, outstanding cable service, the fastest internet provider in the state, and a facility based residential voice competitor.

Raymond appreciates partners who share the same sense of community as we do and Comcast has clearly demonstrated their willingness to be part of our Town. It is my hope that the FCC will approve the Comcast/NBCU partnership.

Sincerely,

Christopher Rose
Town Manager
Town of Raymond

Re: MB Docket No. 10-56

June 1st, 2010

Dear Chairman Genachowski:

I am the Director of Seabrook, NH Recreation Department. I am writing in support of the Comcast-NBC Universal venture.

Seabrook is a sea-side community located in southern New Hampshire. Our residents are proud of the Town's rich heritage and our partnership with Comcast. In Seabrook, Comcast has demonstrated a record as a dependable corporate citizen. They delivered on their promises of system upgrades, better cable service, ever-improving broadband internet and facilities-based residential voice competition.

Comcast has been a good neighbor to Seabrook. In April of this year over one hundred (100) Comcast employees volunteered their time at Governor Weare Field to prepare for the up-coming baseball season. They spread new loom on the diamonds, added a fresh coat of paint to the bleaches, planted flower beds, and built new stairs for the announcing booth. This day of volunteering was recognized by a proclamation issued by the Town's Board of Selectmen.

It is my hope that the FCC will approve the Comcast and NBC Universal partnership.

Sincerely,

Sandra Beaudroin

RE: MB Docket 10-56

Dear Chairman Genachowski:

Comcast, which takes a very active role in the communities it serves, has become woven into the fabric of Trenton, Michigan. As Mayor, I therefore write you to request that the FCC approve Comcast's proposed union with NBC Universal.

Although Trenton is a small community of less than 20,000 residents, we are blessed to have the Detroit River International Wildlife Refuge in our midst. This year, Comcast combined Earth Day and Comcast Cares Day, bringing dozens of employees, family members and friends to plant more than 100 trees. This is a wonderful project that brings the community together for an excellent purpose.

Comcast does many other things in Trenton to help our residents. It enables our children to bridge the digital divide by providing courtesy broadband service in our schools and library. It is a solid employer, offering above average wages and benefits to its employees, some of whom live in our community.

In light of all that Comcast does for Trenton, I ask the FCC to approve its proposed union with NBC Universal.

Sincerely,

A handwritten signature in black ink that reads "Gerald R. Brown".

Re: MB Docket No. 10-56

Dear Chairman Genachowski:

Breakthrough Cambridge is a tuition-free, year-round academic support program in Cambridge, Massachusetts that serves low-income children. We depend on grants from private foundations and companies. Comcast has helped make our work possible with their loyal and generous support. Because of that, I am proud to testify to Comcast's excellent citizenship and commitment to their community while the FCC is considering their request to partner with NBC Universal.

Breakthrough Cambridge offers a unique learning experience for students in sixth through twelfth grade. Over 90% of our children are of color; 70% qualify for free or reduced-price lunch versus 47% of students in the district and 49% speak languages other than English at home versus 35% district-wide. Comcast's support helps us inspire in our students an excitement for learning, creating paths to college and success in the workplace and life.

It is a pleasure to partner with a company like Comcast that not only gives back to the community, but understands the real meaning of corporate citizenship. On behalf of the professionals and students of Breakthrough Cambridge, I commend Comcast as a benevolent and active corporate citizen and hope that our endorsement informs your decision regarding their plan to join with NBC Universal.

Sincerely,

Laurie Rothstein

Re: MB Docket No. 10-56

Dear Chairman Genachowski:

As a former Mayor of Gloucester, Massachusetts I would like to add a voice of support as the FCC undertakes review of the Comcast and NBC Universal partnership proposal. Comcast is an important member of the Gloucester business community and its solid corporate citizenship should not go unnoticed.

As a service provider, Comcast has set itself apart by listening to community needs and responding successfully to them. In Gloucester that is best represented by Comcast's construction of a broadband platform to serve our local households and businesses. This infrastructure was something our local consumers asked for and Comcast made it possible. Our businesses have especially benefited from high-speed Internet service as it has connected them to a whole new audience of consumers.

What's more, Comcast is also providing broadband services to our local schools and libraries at no cost. Comcast took the lead in developing local programming in Gloucester through a not for profit local public access organization. As a result, our residents, public officials and businesses stay connected, receive information and communicate with the community.

As Mayor I certainly benefited from Comcast's support in producing public service announcements about our events and mission. Comcast also has an outstanding record as an employer. The company is widely known and respected for providing the type of quality jobs.

Our community and businesses are better off because of Comcast and we are grateful for the improvements it has made possible here. I ask the FCC to keep Comcast's contributions to Gloucester in mind when reviewing its proposal to join with NBC Universal.

Sincerely,

John Bell

RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

The Knoxville Area Urban League ("KAUL"), an affiliate of the National Urban League, strives to be the recognized leader in the greater Knoxville area in promoting diversity and economic and social equity for all citizens. In particular, our programs are designed to advance the aspirations of African Americans, other minority groups and the disadvantaged to secure economic self-reliance, parity, power and civil rights.

Today I'm pleased to offer KAUL's endorsement of Comcast's proposed joint venture with NBC Universal. We're always on the lookout for companies that not only share our values but also take that all-important "next step" and put their words into action. That's exactly what we've seen Comcast and its employees do over our relationship of more than seven years.

Comcast has provided essential grant funding for local initiatives aimed at increasing literacy and developing the self-sufficiency skills that Knoxville's at-risk youth need in order to be successful in an increasingly competitive job market. Specifically, Comcast has worked with the "Read and Rise" program which helps teach adults (young and old) new skills for becoming literacy advocates in the community – as well as in their own homes. Comcast has also supported the "National Urban League Incentives to Excel & Succeed (NULITES)" program. NULITES brings youth together at a summit designed to teach self-reliance, professional competence and the importance of becoming more engaged members of their communities. NULITES accomplishes these goals by providing participants exposure to a diverse array of individual speakers as well as engaging activities, and we've been grateful for Comcast's commitment to making the effort a genuine success story.

KAUL has gotten to know Comcast at multiple levels: one of its local executives, Russell Byrd senior director of government and public affairs, sits on our board; we've worked closely with the company on community empowerment efforts; and we've seen the revolutionary impact its broadband Internet technology has had on how Knoxville residents live, learn and work. We're confident its planned expansion and partnership with NBC Universal will be a net-positive for our community, and we look forward to a long future working side-by-side with this dynamic company.

Warm regards,

Phyllis Y. Nichols
President and CEO

RE: MB Docket 10-56

Dear Chairman and Commissioners:

I am in support of the Comcast – NBC joint venture. Comcast being a Philadelphia based corporation has brought revenue to the business community and has continued to support progression in the communities it serves as a direct result of Comcast's sustained growth and expansion.

In particular, their support of Diversity is unmatched in this country and as the owner of a minority owned company doing business nationally, I can attest to it firsthand. Purchasing from diverse companies is only part of supporting diversity; to understand the importance of partnering is critical in helping a business to learn and grow. To have a relationship with an organization as responsible in the business community as Comcast, gives a company creditability which cannot be purchased. Companies can also learn from Comcast what it means to be a good Corporate Citizen which is responsibility to people and communities.

The Comcast – NBC joint venture can only enhance, not control, the information that is broadcast to the general public. With the amount and accessibility of information on the World Wide Web and the versatility in the over the air programming (ABC, CBS, FOX), the proposed joint venture does not restrict or infringe on my ability to access and process information.

NBC has experienced loss in viewership in the past year, and as a major television network has not performed up to the expectations of the investors, advertisers and the general public. Comcast can potentially restore NBC viewership while, as stated by Brian Roberts Comcast CEO, "the NBC broadcast network would remain free to over-the-air viewers." (*New York Times*, By Brian Stelter, Published: February 4, 2010)

Comcast services remain versatile, entertaining and beneficial. The organization has proven successful during a trying economy and I envision likewise success for the Comcast – NBC joint venture.

Sincerely,

Garry V. Maddox
Principal, CEO

Re: MB Docket No. 10-56

June 10, 2010

Dear Chairman Genachowski:

I am the Executive Director of PACTV, a not-for-profit membership-based organization that provides a public forum for the communities of Plymouth and Kingston, Massachusetts through Public, Educational and Government Access television. I am writing in support of the Comcast-NBC Universal venture, because Comcast has gone well above and beyond simply cablecasting our programming.

PACTV staff and volunteers promote other area non-profit and service organizations by providing community bulletin boards and producing and cablecasting public service announcements and special programming at no cost. For example, Comcast helps us cablecast the annual Plymouth Rotary Club Telethon Charity Auction by providing the fiber connection from the event to the local studio. The company also donates the technical assistance to open the auction to cable stations in surrounding towns. Further, the company provides the telephone service for the auction free of charge. All of this is especially important because the auction is the Rotary's major source of funding. Comcast's support has helped that organization expand its reach and, therefore, its donor base.

Comcast also provides technical assistance that allows us to present a live cablecast of both the local Thanksgiving Day parade and our 4th of July parade. These are annual town traditions that would be missed by my community's many citizens without Comcast's support and assistance.

Comcast has been and continues to be an extraordinary community partner. I urge you to consider Comcast's contributions to our organization and our communities in your decision-making process.

Sincerely,

Nancy Richard
Executive Director
PACTV

Re: MB Docket No. 10-56

Dear Chairman Genachowski:

I am writing to you today in my capacity as Executive Director of WMCT-TV in Marlborough, MA. WMCT supports the merger of Comcast Corporation and NBC Universal because of Comcast's history of supporting public access programming here in Marlborough.

Since we went on the air in 1984 we have produced hundreds of local content programming for the viewing pleasure of Marlborough residents. Currently, our station produces 17 regular programs in addition to our weekly newscast. The challenge of operating public access stations is daunting, especially in these times, but because of the support of Comcast, we continue to provide a wonderful service to the residents of Marlborough.

We believe it is our responsibility to provide the residents of Marlborough with a dependable community based view of the city. We strive to supply our viewers with the best possible coverage of local events and politics. Comcast supports us in that endeavor. To me, that support indicates Comcast has an appreciation for the importance of community based media and in particular for PEG programming.

Though I assume that our station will not be able to cover the hearings into this issue, I hope you will take into account the important role that Comcast plays in supporting WMCT and our coverage of the local community. And I am sure we will see you soon not only in Marlborough, but on our community television stations as well.

Sincerely,

A handwritten signature in black ink, appearing to read 'Daniel Gannon', written over a white background.

Re: MB Docket No. 10-56

Dear Chairman Genachowski,

Based in California, New America Media (NAM) is the country's first and largest national collaboration and advocate of 2,000 ethnic news organizations. Ethnic media is the fastest growing sector of American journalism and as such our organization's goal is to bring the voices of the marginalized into the national discourse. We do this by producing, aggregating and disseminating multimedia content and services for the youth and ethnic media sectors.

NAM's long-standing partner in the effort to reach ethnic communities is Comcast Corporation. The company has shown continued dedication to providing a platform to sectors of our population that are simply not heard from enough. Comcast was among the first corporate sponsors of NAM's national Expos, helping draw others to our marquee. By supporting our organization, Comcast ensures that greater numbers of ethnic media outlets will be recognized and included in NAM's nationwide online directory. The importance of this function cannot be overstated, as close to 60 million ethnic adults connect to each other, home countries and to America via ethnic media sources every day.

Comcast should also be recognized as an important platform for ethnic communities. For example, Comcast's San Francisco Bay Area's GET LOCAL Channel and its ON DEMAND service showcase ethnic media video reports. These are the stories that reflect who we are becoming as a global society.

We could not share our message or give voice to those who need it without Comcast's support.

As you explore the opportunity for Comcast and NBC Universal to join, we hope you will keep our experience with Comcast in mind. We are highly supportive of the proposal.

Sincerely,

Sandy Close
Executive Director
New America Media

Re: MB Docket No. 10-56

Dear Chairman Genachowski:

On behalf of the Motor City Blight Busters (MCBB) of Detroit, Michigan, I am writing to urge the FCC's support of the Comcast and NBC Universal venture. Comcast has been a wonderful partner to MCBB and bolsters our work with critical volunteer support every year.

In our remarkable 21-year history, Motor City Blight Busters and our 120,000 volunteers have contributed more than 658,000 hours to paint 684 homes, secured 379 abandoned buildings, renovated 176 houses and built 114 new ones to make suitable housing for 1,160 people in Detroit. We fed 350 people at our first Thanksgiving dinner, provided 300 students with training in building trades and culinary arts and offered free health screening to 500 citizens.

Included in our efforts are the countless Comcast employees who joined us on Comcast Cares Day. Comcast and its employees help revitalize and re-energize our community through this day of volunteer support and other efforts throughout the year.

In fact, Comcast is well known for its philanthropy, volunteerism, and other efforts to meet the needs of local communities where it does business. Comcast truly is a national company with a local presence and local concerns for those in need.

I believe that Comcast's proposed transaction with NBC Universal will only enhance Comcast's ability to serve local needs in innovative ways. I am writing in support of this venture and hope that you will approve the partnership.

Sincerely,

John George, Founder & President

Re: MB Docket No. 10-56

Dear Chairman Genachowski:

As the Mayor of Marana, Arizona, I am writing to offer my support for the Comcast and NBC Universal partnership and to acknowledge the integral role Comcast has played in the economic and community development of Marana.

Incorporated in 1977, Marana's short history has been shaped by its devoted community partners and pioneering residents. Thirty-three years after its founding, Marana's population has soared to over 35,000 and continues to grow steadily each year. Comcast, which has offices located in Marana, employs our residents as well as and friends from neighboring communities.

Comcast supports Marana's *Economic Roadmap*, a carefully planned initiative that will guide our leaders and citizens for decades and preserve Marana's precious commodities for future generations. Comcast's values, especially its commitment to community investment and to supporting the capacity of small and mid-sized businesses, are perfectly matched with Marana's values. Whether Comcast is wiring and providing complimentary broadband access to our schools and public libraries, lending its support to the Town Council, or providing assistance for our annual Fourth of July celebration, its presence positively impacts our residents' quality of life.

Comcast's employees, too, are committed to the success of Marana. Last year on Comcast Cares Day, Comcast team members partnered with the local branch of Habitat for Humanity to build a new home in Honea Heights for low-income community members and cleaned up several homes in the neighborhood. This year, nearly 200 Comcast employees and their families again volunteered their time and considerable talents to improve our community by enhancing a school in the Marana School District.

Comcast signs on yearly to sponsor the Mayor's State of the Town Address, an important forum to share ideas, engage new resources and bolster the community spirit of Marana. Comcast is our partner in our effort to sustain the values of Marana as we rapidly expand, becoming a more diverse and economically sound place to live, work, shop and play. On behalf of Marana, I recommend Comcast's union with NBC Universal to the FCC.

Sincerely,

Ed Honea
Mayor, Town of Marana

RE: MB Docket 10-56

Dear Chairman Genachowski:

Please approve the proposed Comcast / NBCU acquisition.

I am an employee of Comcast, supporting our California customers. Since joining the company in 2006 I have seen a continual focus on providing the best possible customer experience, along with making Comcast the best possible corporate/community partner.

Together, Comcast and NBCU can help to deliver the "anytime, anywhere" future that our society is craving and all Americans want. In combination, I see this new company as an even more creative and innovative entity better able to meet consumer demands.

Separately Comcast is truly a strong community partner and this acquisition will allow Comcast to continue to be a viable corporation and further our ability to make positive impacts within our communities. Through our involvement in local programming of high school sports, community events and educational/governmental information Comcast provides a valuable information source for citizens. I personally have had the pleasure of being involved with our Comcast Cares Day efforts each year since joining the company. Our activities have provided much needed improvements to our local schools and children's lives all through our corporate donations and Comcast employee involvement. These kinds of local efforts truly make a difference and demonstrate our company's commitment to our communities.

I agree with Mr. Roberts in that I see this joint venture as a very good thing for consumers, innovation, and competition and hope that the Federal Communications Commission will allow Comcast to move forward with the acquisition of NBCU.

Thank you for your consideration,

Scott Sanford

Re: MB Docket 10-56

Dear Chairman Genachowski:

As a Comcast employee, I am writing you to support the pending merger between Comcast and NBC Universal. I have been an employee of Comcast for four years and I can attest that this is a company that strives to do right by its customers, its employees and its investors. I believe this merger would benefit all there constituencies.

I am proud to be a Comcast employee and I look forward to a strong future for our company.

Sincerely,

Jim Samaha

RE: MB Docket 10-56

Dear Chairman Genachowski:

I am writing today in strong support of the proposed joint venture between Comcast and NBC Universal. As an employee of Comcast, I can personally attest to the integrity, community involvement, and commitment to superior customer service of this company. I believe the merger will only amplify the positive experience for both Comcast's workforce and consumers.

Comcast truly is a great place to work. The company provides good jobs with excellent benefits to its employees. It values professional development, work-life balance, and diversity. The company continues to keep great jobs in America in this age of mass outsourcing. This is something I believe sets us apart from other large corporations.

Second, Comcast has been a conscientious corporate citizen. From the annual investments made by the Comcast Foundation, to our yearly day of service Comcast Cares Day, to our support of local community organizations and events, Comcast shows up for the communities in which its employees and customers live and work.

On a personal note, as a member of the lesbian, gay, bisexual and transgender (LGBT) community, I have felt fully supported at Comcast. From benefits that are offered to my same-sex partner, to the company's support of LGBT organizations and causes, to local content that Comcast produces that has an LGBT theme, I feel my diversity is not only embraced but seen as an asset to the company.

I am appreciative of the FCC's efforts to closely scrutinize this merger in the interest of the public. However, I believe our government can place trust in Comcast's good intentions and goals in this merger.

Thank you for considering my perspective.

Sincerely,

Alice L. Kessler

Re: MB Docket No. 10-56

Dear Chairman Genachowski:

As a former Mayor of Gloucester, Massachusetts I would like to add a voice of support as the FCC undertakes review of the Comcast and NBC Universal partnership proposal. Comcast is an important member of the Gloucester business community and its solid corporate citizenship should not go unnoticed.

As a service provider, Comcast has set itself apart by listening to community needs and responding successfully to them. In Gloucester that is best represented by Comcast's construction of a broadband platform to serve our local households and businesses. This infrastructure was something our local consumers asked for and Comcast made it possible. Our businesses have especially benefited from high-speed Internet service as it has connected them to a whole new audience of consumers.

What's more, Comcast is also providing broadband services to our local schools and libraries at no cost. Comcast took the lead in developing local programming in Gloucester through a not for profit local public access organization. As a result, our residents, public officials and businesses stay connected, receive information and communicate with the community.

As Mayor I certainly benefited from Comcast's support in producing public service announcements about our events and mission. Comcast also has an outstanding record as an employer. The company is widely known and respected for providing the type of quality jobs.

Our community and businesses are better off because of Comcast and we are grateful for the improvements it has made possible here. I ask the FCC to keep Comcast's contributions to Gloucester in mind when reviewing its proposal to join with NBC Universal.

Sincerely

John Bell

RE: MB Docket No. 10-56

Dear Chairman Genachowski and Commissioners:

As someone who has held elected office for the past eighteen years in the Michigan State Senate, Michigan State House and as Clerk of Gaines Township, I know from personal experience that good government is essential for sustaining communities but cannot solve every problem. Frequently, the contributions of corporations and individual citizens are every bit as important.

With this in mind, I am writing to you today regarding your oversight of the proposed combination of Comcast and NBCU. Although I cannot address the merits of the merger itself, I am pleased to tell you that Comcast and its employees have made a huge difference in my community.

The volunteer spirit of Comcast's employees is profound. During last year's Comcast Cares Day, for example, approximately 2,400 volunteers contributed more than 11,000 hours of community service to local nonprofit organizations across Michigan. In coordination with the Michigan Mobility & Accessibility Partnership, which I chair, we worked with Comcast and our collective efforts resulted in the construction of wheelchair-accessible ramps at five homes. One of the new ramps was built at the home of a disabled Rockford resident in my district. In addition, as part of Comcast Cares Day, Comcast has provided volunteers for the past two years to help maintain the White Pine Trail in my district. This year, over 100 Comcast volunteers gave their time to help beautify this great asset in West Michigan.

In your evaluation of Comcast and its pending merger, I hope you'll take into account the company's longstanding dedication to giving back to those in need.

Sincerely,

Mark C. Jansen
