

I am very concerned about the possible removal of website hosting from the list of E-rate eligible services.

As we continue to become a more web-based community, I must say I am in total disagreement with your plan to remove webhosting services from the Eligible Services List.

Our website is fast becoming the most critical and valuable means of communication between teachers, students, administrators, parents and the community. In addition there are several state laws requiring certain items to be posted on the district or school websites.

Having current information about the education of our children is essential to our educational purpose.

Schools today face major funding issues and cutbacks of all sorts. Please, PLEASE do not take away the very information that enables our parents to be the most involved and make the best decisions possible about the education of their children!

Websites are EXTREMELY essential to educational purposes. I strongly urge you NOT to move forward with your plan to remove webhosting.

Thank you for your consideration.
